Social Structure and Self-direction Melvin L. Kohn,1993

Social Structure, Work, and Personality Melvin L. Kohn,1990

Social Structures and Aging Individuals K. Warner Schaie,Ronald P. Abeles,2008-07-02 A useful reference book

Readers will find themselves returning to chapters again and again PsycCritiques This is the 20th and final volume in the Societal Impact on Aging series It focuses on what has been learned over the span of the previous volumes regarding the continuing challenges for older persons in a rapidly changing society and tries to forecast what may be the next set of issues to lie at the intersection of social structures and the individual aging process The editors therefore invited major organizers of and contributors to the 19 earlier volumes to review both the accomplishments and omissions of their efforts discuss some timely new topics and provide guidelines for future research and theoretical explanations The book is divided into five broad topics health and wellbeing including the role of religion personality and cognition the impact of changes in technology and the work place issues of socio cultural change and historical context and the familial and societal contexts of aging After the Fall of the Wall Martin Diewald,Anne Goedicke,Karl Mayer,2006-09-26 The fall of the Berlin Wall in 1989 was the beginning of one of the most interesting natural experiments in recent history The East German transition from a Communist state to part of the Federal Republic of Germany abruptly created a new social order as old institutions were abolished and new counterparts imported This unique situation provides an exceptional opportunity to examine the central tenets of life course sociology The empirical chapters of this book draw a comprehensive picture of life course transformation demonstrating how the combination of life course dynamics coupled with an extraordinary pace of system change affect individual lives How much turbulence was created by the transition and how much stability was preserved How did the qualifications and resources acquired before 1989 influence the fortunes in the restructured economy How did the privatization and reorganization of firms impact individuals Did the transformation experiences differ by age cohort and gender How stable were social networks at work and in the family Were personality characteristics important mediators of post 1989 success or failure or were they rather changed by them How specific were the East German life trajectories in comparison with Poland and West Germany *Parents' Jobs and Children's Lives* Toby Lee Parcel,Elizabeth G. Menaghan, *Parents Jobs and Children's Lives* considers the effects of parental working conditions on children's cognition and social development It also investigates how parental work affects the home environments that parents create for their children and how these home environments influence the children directly The theoretical underpinnings of the book draw from both sociology and economics in addition the authors make use of literature derived from developmental psychology Theoretically eclectic they rely on the personality and social structure framework developed by Melvin Kohn and his colleagues on arguments regarding the importance of family social capital developed by James Coleman as well as on ideas from Gary Becker's new home economics as guides to model specification The empirical basis for Parcel and Menaghan's study is a

series of multivariate analyses using data drawn from the 1986 and 1988 waves of the National Longitudinal Survey's Child Mother data set. This data set matches longitudinal data on mothers derived from the National Longitudinal Survey of Youth with data on the children of these mothers born as of 1986. Children aged 3 to 6 were given age appropriate developmental assessments every two years in order to assess the influence of parental work on short term changes in their cognition and social behavior. The authors also devote considerable attention to the effects of fathers work and family structure on the well being of their children. Parcel and Menaghan's work brings evidence to bear on both the theoretical perspectives guiding the analyses and on current policy debates regarding the nexus of work and family.

The Breakdown of Class Politics Terry Nichols Clark, Seymour Martin Lipset, 2001-05-22. Class and its linkage to politics became a controversial and exciting topic again in the 1990s. Terry Clark and Seymour Martin Lipset published *Are Social Classes Dying* in 1991 which sparked a lively debate and much new research. The main critics of Clark and Lipset at Oxford and Berkeley held initially that class was more persistent than Clark and Lipset suggested. The positions were sharply opposed and involved several conceptual and methodological concerns. But the issues grew more nuanced as further reflections and evidence accumulated. This book draws on four main conferences organized by the editors. Sharply contrasting views are forcefully argued with rich and subtle evidence. The volume includes a broad overview and synthesis, major reports by leading participants and original theoretical and empirical contributions.

Unequal Childhoods Annette Lareau, 2003-09-11. Publisher Description **Psychology, Fourth Edition** Peter O. Gray, 2002. The new edition of Gray's acclaimed text featuring dramatic new coverage of sensation and perception and new media tools that actively involve students in psychological research.

Parental well-being Barbara Holthus, Hans Bertram, 2018-10-17. Pursuing happiness is not only idealistic; it is the world's best and perhaps only hope to avoid global catastrophe. Global Happiness Policy Report 2018. With that, the report argues for happiness as overarching policy goal. This volume argues that parental well being is well qualified to assume a central role for governments of industrially advanced nations that are in need of coping with the challenges of low fertility and societal aging. More than 4000 mothers and fathers of young children in Germany and Japan have been surveyed in regard to their well being and satisfaction with many aspects related to their work and family lives. The volume brings together 13 scholars to analyze this unique dataset. The chapters fall into three main parts: 1. parenting and childcare, 2. self social relatedness and social structures, and 3. family policy well being. A particular focus lies on the well being of mothers in contrast to fathers. The volume uses a multidimensional concept of parental well being with each chapter highlighting one dimension ranging from health, education, employment, and family policy satisfaction to partnership, social network, and childcare satisfaction. National differences are in several aspects superseded by gender, class, and personality types.

Paradoxes of Individualization Dick

Houtman, Stef Aupers, Willem de Koster, 2016-12-05 Paradoxes of Individualization addresses one of the most hotly debated issues in contemporary sociology whether a process of individualization is liberating selves from society so as to make them the authors of their personal biographies The book adopts a cultural sociological approach that firmly rejects such a notion of individualization as naïve The process is instead conceptualized as an increasing social significance of moral notions of

individual liberty personal authenticity and cultural tolerance which informs two paradoxes Firstly chapters about consumer behavior computer gaming new age spirituality and right wing extremism demonstrate that this individualism entails a new yet often unacknowledged form of social control The second paradox addressed in chapters about religious cultural and political conflict is concerned with the fact that it is precisely individualism s increased social significance that has made it morally and politically contested Paradoxes of Individualization will therefore be of interest to scholars and students of cultural sociology cultural anthropology political science and cultural religious and media studies and particularly to those with interests in social theory culture politics and religion

The Intersystem Model Margaret M. Conger, 1997-02-03 The book introduces the reader to one of the most provocative conceptual models in nursing today It breaks new ground not only in its presentation of the Intersystem Model but also in its in depth treatment of the spiritual subsystem as an intrinsic part of the biological psychosocial spiritual triad The contributors provide case examples and concrete tools that will allow readers to apply the model and incorporate it into their personal and conceptual framework of practice

Paradoxes of Gender Judith Lorber, 1994-01-01 In this pathbreaking book a well known feminist and sociologist who is also the Founding Editor of Gender why transvestites transsexuals and hermaphrodites do not affect the conceptualization of two genders and two sexes in Western societies why most of our cultural images of women are the way men see them and not the way women see themselves why all women in modern society are expected to have children and be the primary caretaker why domestic work is almost always the sole responsibility of wives even when they earn more than half the family income why there are so few women in positions of authority when women can be found in substantial numbers in many occupations and professions why women have not benefited from major social revolutions Lorber argues that the whole point of the gender system today is to maintain structured gender inequality to produce a subordinate class women that can be exploited as workers sexual partners childbearers and emotional nurturers Calling into question the inevitability and necessity of gender she envisions a society structured for equality where no gender racial ethnic or social class group is allowed to monopolize economic educational and cultural resources or the positions of power
