2nd edition

Patrick Baert & Filipe Carreira da Silva

The background of the cover features a dense, overlapping arrangement of stylized human figures made of paper. The figures are in various shades of white, light grey, and beige. They are scattered across the entire surface, with some appearing more prominent than others, creating a sense of a large crowd or a complex social structure. The figures are simple in design, with rectangular bodies, circular heads, and limbs extended at various angles.

Social Theory and Modern Sociology Anthony Giddens, 2013-04-25 In this book Anthony Giddens addresses a range of issues concerning current developments in social theory relating them to the prospects for sociology in the closing decades of the twentieth century

Composed of closely integrated papers all written over the past few years the book includes seven essays not previously published plus two have not appeared in English before In assessing the likely future evolution of sociology in particular and the social sciences in general the author both draws upon ideas established in his more abstract theoretical writings and examines critically competing traditions of thought Those looking for an accessible introduction to Giddens's writing will find in this book a set of clear expositions of his basic ideas By situating these ideas in relation to the critical assessment of the views of others however the author provides new sources of insight into the distinctiveness of his own claims *Social Theory of Modern Societies* David Held, John Brookshire Thompson, John B. Siècle Social Theory Jeffrey C. Alexander, 1995 In four closely interwoven studies Jeffrey Alexander identifies the central dilemma that provokes contemporary social theory and proposes a new way to resolve it The dream of reason that marked the previous fin de siècle foundered in the face of the cataclysms of the twentieth century when war revolution and totalitarianism came to be seen as themselves products of reason In response there emerged the profound skepticism about rationality that has so starkly defined the present fin de siècle From Wittgenstein through Rorty and postmodernism relativism rejects the very possibility of universal standards while for both positivism and neo Marxists like Bourdieu reductionism claims that ideas simply reflect their social base In a readable and spirited argument Alexander develops the alternative of a neo modernist position that defends reason from within a culturally centered perspective while remaining committed to the goal of explaining not merely interpreting contemporary social life On the basis of a sweeping reinterpretation of postwar society and its intellectuals he suggests that both antimodernist radicalism and postmodernist resignation are now in decline a more democratic less ethnocentric and more historically contingent universalizing social theory may thus emerge Developing in his first two studies a historical approach to the problem of absent reason Alexander moves via a critique of Richard Rorty to construct his case for present reason Finally focusing on the work of Pierre Bourdieu he provokes the most sustained critical reflection yet on this influential thinker *Fin de Siècle Social Theory* is a tonic intervention in contemporary debates showing how social and cultural theory can properly take the measure of the extraordinary times in which we live

society government or private enterprise This book shows that these polemical debates are governed not so much by access to facts as they are by the political ideology of the expert advancing a particular argument Moreover the thoughts of these experts tend to be based largely in just one of three competing streams of political thought the left the center or the right Drawing on social theory the author explains the philosophical origins of this tendency to rely on just one of three traditions and why this poses a serious obstacle to conceptualizing the cause nature and resolution of environmental problems Sunderlin argues that laying the foundation for a livable world involves giving conscious and dedicated attention to the core tenets of all three political traditions action against class inequality and advocacy of social justice within and among countries reformation of laws and policies emanating from the halls of power and technological innovation in centers of research and wholesale cultural change and promotion of individual initiative responsibility and creativity
