Between Babasaheb and Mahatma Hulas Singh, 2024-10-16 This book is a critical comparative study of Jotirao Phule and Bhimrao Ramji Ambedkar modern India s two most prominent dalit leaders Although they were not close contemporaries they came to construct a firm structure of not only dalit ideology but also dalit methodology to emancipate the oppressed and depressed sections of society The book deals with their ideas in a new light highlighting aspects of convergence and contrast in their respective approach to philosophy religion society and culture It argues that deep down in his philosophic orientation Phule was quintessentially closer to Gandhi than to Ambedkar The author also contends that the usage of the term dalit exclusively in the caste communitarian sense is essentially a product of post independence political appropriation rather than social evolution The book specifically brings to light the dynamics of humanism and nationalism on the one hand and that of communitarianism on the other in the context of twentieth century colonial India Notably Gandhi is brought in the narrative to complete the triumvirate Comprehensive and deeply grounded in primary research this thought provoking book will be indispensable for students and researchers of modern Indian history sociology political science political thought exclusion studies dalit and subaltern studies and South Asian studies It will also appeal to those interested in the writings of Ambedkar and Phule

Main Currents in Sociological Thought: Volume Two Raymond Aron, 2025-05-06 The second volume of the landmark study examining the work of sociology s defining thinkers from the turn of the nineteenth century to the interwar period Main Currents in Sociological Thought remains a foundational synthesis in the field In this second and final volume of his classic survey Raymond Aron explores the work of three figures who profoundly shaped sociology as it entered the twentieth century Durkheim who continued Comte s quest for a science of society and a scientific validation of morality Pareto the Italian neo Machiavellian who emphasized the elitist character of all societies and Weber the German sociologist who reflected critically on the prospects for human freedom in an age of disenchantment Bringing together penetrating intellectual portraits of these great thinkers and close readings of their most consequential texts Main Currents in

Sociological Thought highlights the historical and intellectual context within which each man wrote and draws out their works enduring insights and influence in the field today **McMaster University, Volume 1** Charles M.

Johnston,2015-09-01 The Toronto Years is the first of three volumes relating the history of McMaster University It is not simply an institutional chronicle which lists names for the record it is a dramatic and colourful story that shows how the university grew out of earlier Baptist educational endeavours and describes its eventful first forty years spent on the Bloor Street Campus in Toronto McMaster University was established in 1887 as a trust of the Baptist constituency which helped to ensure vital and ongoing financial support but which also embroiled the school in the often bitter theological debates sweeping through the churches In the 1920s the struggle between modernism and fundamentalism threatened the university s very existence Fluctuating enrolment wartime stresses and education continually forced confrontations over the question of federation with the provincial university in Toronto Charles Johnston describes the achievements of a small group of courageous and skilful administrators amid the conflicting currents of educational and religious development in Canada during a period when universities were the targets of traditional criticisms of urban values This volume will be of interest to anyone concerned with the cultural and intellectual growth of the nation **Social Thought from Lore to Science** Harry Elmer Barnes,Howard Paul Becker,1961 Siskiyou County only has volume 1 and volume 2 *Main Currents in Sociological Thought* Raymond Aron,1999 In this second volume of Main Currents of Sociological Thought Raymond Aron continues the analysis begun in the first volume of the great doctrines of historical sociology Aron explores the work of three figures who profoundly shaped sociology as it entered the twentieth century Emile Durkheim the great French theorist of consensus who continued Auguste Comte s quest for a science of society and a scientific validation of morality Vilfredo Pareto the Italian neo Machiavellian who mocked traditional morality and humanitarian pretensions and emphasized the oligarchic or elitist character of all societies and the German sociologist Max Weber who reflected continuously on the relationship between science and action filled with deep foreboding about the prospects for human freedom in an age marked by bureaucratization and rationalization Aron presents rich portraits of these three thinkers drawing from them what remains of enduring worth even as he distances himself from Durkheim s project for a science of society Pareto s exaggerated critique of humanitarianism and Weber s tragic pessimism Aron s book is essential for clarifying his profound indebtedness to and crucial divergences from the thought of Max Weber the sociologist par excellence in Aron s view Together with volume 1 which treats the work of Montesquieu Comte Marx and Tocqueville it forms the definitive survey of the great social thinkers to date Yet as Daniel J Mahoney and Brian C Anderson explain in their introduction Main Currents is more than a survey it is above all a challenge to contemporary social science to retain the ambition of an older philosophically informed sociology to present an interpretation of modern society and to reflect on the meaning of universal history **Irish Political Studies Reader** Conor McGrath,Eoin O'Malley,2007-10-18 This is an introduction to the best available scholarship within Irish

politics featuring the most influential and significant articles which have been published on Irish politics during the past twenty years Each article is accompanied by a new commentary by another leading scholar which addresses the impact and contribution of the article and discusses how its themes remain crucial today The book covers all the most important topics within Irish politics including political culture and traditions political institutions and parties and the peace process The combination of the best original scholarship and contemporary commentaries on the core political issues makes Irish Political Studies Reader an invaluable resource for all students and scholars of Irish politics

Pareto on Policy Warren Samuels, 2017-07-05 Warren Samuels interprets Vilfredo Pareto's Treatise on General Sociology in terms of a general equilibrium model of policy Three themes and one conviction run throughout the study The first is a model of policy making involving three sets of variables power knowledge and psychology The second is a general equilibrium approach to the study of these variables emphasizing their fundamental interdependence The third is the importance of Pareto's work Pareto is one of the few individuals whose work has had enormous influence in at least three social sciences in the twentieth century economics sociology and political science Despite Pareto's attempt in the Treatise to produce a general sociology encompassing all of these sciences as well as psychology his work has been treated almost completely from the perspectives of the individual disciplines This volume's interpretation is consonant with Pareto's intention in the Treatise namely to provide a general equilibrium model of the total socio politico economic decision making or policy process The book is directed at those who comprehend these as processes

whose structure conduct and performance are a function of complex decision making Social scientists and policy analysts have moved beyond models that solve problems in the abstract without working them out through policy making in the real world The approach outlined here is important to those who are interested in pursuing the working rules of law and morals that govern the distribution and exercise of power as well as the exercise of power that governs the development of these rules
