## **Social Working An Ethnography Of Front Line Practice:**

**Social Working** Gerald A.J. de Montigny, 1995-12-15 In this unique work directed at social workers Gerald A J de Montigny maintains that they along with other professionals create an institutional reality through their day to day practices He traces the practical ways that social workers when involved in child protection struggle to produce a world which can be ordered systematized and subjected to their powers It is a penetrating and sensitive analysis of how social workers in their everyday practice make sense from a confusing collection of case details to create organizationally defined problems and cases De Montigny uses the tension between his experience of growing up working class and the difficult process of becoming a social worker to explore the practical activities professionals use to secure organizational power and authority over clients This tension has forced him to confront the dilemma of how to stand on the side of clients when standing inside professional and organizational realities In the first half of the book de Montigny focuses on the practices social workers use to produce a universalized professional form of knowledge He examines social workers use of ideological practices fetishization of the social work profession insertion of details from clients lives into discursive order accounting for front line practice as a problem solving scientific practice and naming of their own frustrations conflicts tensions and pain as professionally manageable phenomena In the second half of the book based on his own work in child protection he systematically examines how such reality producing practices come to be expressed as child protection He develops a synthetic account of his social work interventions on cases of child abuse and neglect This book should be read by all practitioners and students of social work It is an original and practical application of theoretical arguments to the everyday reality of social work

**Scripting Addiction** E. Summerson Carr, 2010-11-03 Scripting Addiction takes readers into the highly ritualized world of mainstream American addiction treatment It is a world where clinical practitioners evaluate how drug users speak about

themselves and their problems and where the ideal of healthy talk is explicitly promoted carefully monitored and identified as the primary sign of therapeutic progress The book explores the puzzling question why do addiction counselors dedicate themselves to reconciling drug users relationship to language in order to reconfigure their relationship to drugs To answer this question anthropologist Summerson Carr traces the charged interactions between counselors clients and case managers at Fresh Beginnings an addiction treatment program for homeless women in the midwestern United States She shows that shelter food and even the custody of children hang in the balance of everyday therapeutic exchanges such as clinical assessments individual therapy sessions and self help meetings Acutely aware of the high stakes of self representation experienced clients analyze and learn to effectively perform prescribed ways of speaking a mimetic practice they call flipping the script As a clinical ethnography *Scripting Addiction* examines how decades of clinical theorizing about addiction language self knowledge and sobriety is manifested in interactions between counselors and clients As an ethnography of the contemporary United States the book demonstrates the complex cultural roots of the powerful clinical ideas that shape therapeutic transactions and by extension administrative routines and institutional dynamics at sites such as Fresh Beginnings

Subversive Action Nilan Yu, Deena Mandell, 2015-12-10 *Subversive Action* presents cases that explore the use of extralegal action undertaken in pursuit of human rights and social justice and

locate that action with reference to the boundaries of social work Definitions of social work often include goals of social change social justice empowerment and the liberation of people but social work texts make little mention of extralegal actions Mainstream conceptions of social work usually consider it to fall within the framework of particular legal and societal contexts As such it is presented with boundaries for legitimate action even as it espouses principles that may require it to challenge these boundaries How does one do social work in legal and societal contexts that challenge these principles with institutional and state mandated exclusion and discrimination Should social workers simply act within the bounds of the law in line with their professional sanction and mandate Do their actions qualify as social work if they are beyond the limits of the law The essays in this volume by authors from around the world raise these questions by providing a basis for reflection about the claims we make in social work embodied in discourses on social justice and human rights Liberating Method Marjorie L. DeVault, 1999 Liberating Method reflects the conviction that feminist insights can and should contribute to a sounder more rigorous social science In this book one of the leading practitioners and teachers of feminist methodology examines profound questions about traditional and customary practices of social research Marjorie DeVault argues that established methods too often ignore social oppression as she charts her quest for approaches that will more adequately represent marginalized groups **Meds, Money, and Manners** Jerry Floersch, 2002-03-06 As case management has replaced institutional care for mental health patients in recent decades case management theory has grown in complexity and variety of models But how are these models translated into real experience How do caseworkers use both textbook and practical knowledge to assist clients with managing their medication and their money Using ethnographic and historical sociological methods Meds Money and Manners The Case Management of Severe Mental Illness uncovers unexpected differences between written and oral accounts of case management in practice In the process it suggests the possibility of small acts of resistance and challenges the myth of social workers as agents of state power and social control
