**Making Citizenship Work** Rodolfo Rosales, 2022-08-24 Making Citizenship Work seeks to address questions of how a community reaches a place where it can actually make citizenship work A second question addressed is What does citizenship represent to different communities Across thirteen chapters a collection of experts traverse multiple disciplines in analyzing citizenship from different points of access Each chapter revolves around the premise that empowerment of communities and individuals within the community comes in different forms and is governed by multiple needs and visions Authors utilize case studies to demonstrate the different roles that communities from a broad sector of our society adopt to accomplish constructing democratic processes that reflect their goals needs and cultures Concurrently authors address the structural obstacles to the empowerment of communities arguing that the democratic process does not and cannot accommodate the diverse communities of society within a single universalistic model of citizenship They conclude that fundamentally citizenship is not simply a legal right an obligation a state of rights but a practice an action on the behalf of community Making Citizenship Work challenges conventional thinking about politics while also encouraging readers to go beyond the box that deters us from visualizing a human society It is an ideal book for undergraduate and graduate courses in political science sociology history social work and Ethnic Studies The Oxford Handbook of Transformations of the State Stephan Leibfried, Evelyn Huber, Matthew Lange, Jonah D. Levy, Frank Nullmeier, John D. Stephens, 2015 This Handbook offers a comprehensive treatment of transformations of the state from its origins in different parts of the world and different time periods to its transformations since World War II in the advanced industrial countries the post Communist world and the Global South Leading experts in their fields from Europe and North America discuss conceptualizations and theories of the state and the transformations of the state in its engagement with a changing international environment as well as with changing domestic economic social and political challenges The Handbook covers different types of states in the Global South from failed to predatory rentier and developmental in different kinds of advanced industrial political economies corporatist statist liberal import substitution industrialization and in various post Communist countries Russia China successor states to the USSR and Eastern Europe It also addresses crucial challenges in different areas of state intervention from security to financial regulation migration welfare states democratization and quality of democracy ethno nationalism and human development The volume makes a compelling case that far from losing its relevance in the face of globalization the state remains a key actor in all areas of social and economic life changing its areas of intervention its modes of operation and its structures in adaption to new international and domestic challenges *Revolutions and Revolutionary Movements* James DeFronzo, 2014-08-12 This comprehensive text analyzes significant revolutions of the 20th and 21st centuries placing them in social economic and political context **Constructing Twenty-First Century Socialism in Latin America** S. Motta, M. Cole, 2014-06-05 In Constructing Twenty First Century Socialism The Role of Radical Education Motta and Cole

explore the role of the politics of knowledge and pedagogy in the reinvention of socialism for the twenty first century Through a critical analysis of Brazil Colombia and Venezuela they deconstruct the mechanisms of neoliberal control as an epistemological project of monologue closure and violence against all others The authors develop an affirmative engagement with the traditions practices and politics which seek to challenge this closure through the policies of the counter hegemonic government of Venezuela the struggles of social movements in Brazil and Colombia and the daily resistance of critical educators working in formal educational settings in all three countries This mapping and analysis not only contribute to struggles for alternatives to capitalism in Latin America but are translatable to other contexts The book theorizes that with the exhaustion of neoliberalism it is time to pedagogize the political and politicize the pedagogical in order to create worlds beyond capitalism

**Behind the Myths** John Pickard, 2013-02-26 There has never been a more important time for a study of the social economic and political origins of Judaism Christianity and Islam the three important world religions that share a common root This book adopts a Marxist that is a materialist view of human development so it takes as its starting point the idea that gods angels miracles and other supernatural phenomena do not exist in the real world and therefore cannot be taken as explanations for the origin and rise of these faiths It looks instead at the material conditions at appropriate periods in antiquity and the social and economic forces that were at work to outline the real foundations of these three doctrines In doing so it challenges the historicity of key figures like Moses Jesus and Mohammed This is a unique book that draws on the research knowledge and expertise of hundreds of historians archaeologists and scholars to create a new synthesis that is both coherent and completely based on a materialist world outlook It is a book written by an unbeliever for other unbelievers as a contribution to a discussion among atheists and secularists as to the real origins of the so called Abrahamic faiths It will be a revelatory read even to those already firmly of an atheist or secularist persuasion underpinning their nonreligious views and it will provide a valuable resource for all those who might be coming to question the hold that organized religion has had on human society

Building Cosmopolis John S. Partington, 2017-03-02 Alongside his reputation as an author H G Wells is also remembered as a leading political commentator of the late nineteenth and early twentieth centuries Building Cosmopolis presents the worldview of Wells as developed between his student days at the Normal School of Science 1884 1887 and his death in 1946 During this time Wells developed a unique political philosophy grounded on the one hand in the theory of Ethical Evolution as propounded by his professor T H Huxley and on the other in late Victorian socialism From this basis Wells developed a worldview which rejected class struggle and nationalism and embraced global co operation for the maintenance of peace and the advancement of the human species in a world society Although committed to the idea of a world state Wells became more antagonistic towards the nation state as a political unit during the carnage of the First World War He began moving away from the position of an internationalist to one of a cosmopolitan in 1916 and throughout the inter war period he advanced the notion of regional and ultimately functional world government to a greater and greater extent

Wells first demonstrated a functionalist society in *Men Like Gods* 1923 and further elaborated this system of government in most of his works both fictional and non fictional throughout the rest of his life Following an examination of the development of his political thought from inception to fruition this study argues that Wells's political thoughts rank him alongside David Mitrany as one of the two founders of the functionalist school of international relations an acknowledgement hitherto denied to Wells by scholars of world government theory

**Hegel for Social Movements** Andy Blunden, 2019-06-17 *Hegel for Social Movements* by Andy Blunden is an introduction to the reading of Hegel intended for those already active in social movements It introduces Hegel's ideas in a way which will be useful for those fighting for social change and while some familiarity with philosophy would be an advantage for the reader the main pre requisite is a commitment to the practical pursuit of ideal aims The book covers the whole sweep of Hegel's writing but focuses particularly on the *Logic* and Hegel's social theory the *Philosophy of Right* Blunden brings to his exposition an original interpretation of Hegel's *Logic* as the logic of social change utilizing his expertise in Vygotsky's cultural psychology and Soviet Activity Theory

**Artisans and Architects** Mark Swenarton, 1988-12-19 **Reclaiming Communist Philosophy** Wilson W. S. Au, 2016-12-01 This book is unique in its utilization of the natural sciences to explain and illustrate key concepts of communist philosophy In its recapitulation of the spirit of Engels's unfinished manuscript *The Dialectics of Nature* it relies on the physical sciences developed since Engels's time to reaffirm the validity of materialist dialectics a point which is more easily made in the context of natural phenomena than it is in social phenomena The basic philosophical tenets underlying Communist ideology are all supported by the natural sciences The book is situated within the Marxist Leninist Maoist tradition Its overarching theme is the need to reclaim our most fundamental weapon of that tradition its methodology or philosophy which has been vitiated or even scrapped by well intentioned revolutionaries throughout the 20th century In particular some of Mao's philosophical formulations are found to be erroneous and in opposition to his practice With the rapidly accelerating deterioration of the global capitalist order in progress since 2007 the urgency of this reclamation cannot be over emphasized

**Encyclopedia of Critical Political Science** Clyde W. Barrow, 2024-03-14 An indispensable and exemplary reference work this *Encyclopedia* adeptly navigates the multidisciplinary field of critical political science providing a comprehensive overview of the methods approaches concepts scholars and journals that have come to influence the discipline's development over the last six decades

**Critical Race Theory and Education** Mike Cole, 2017-02-15 This book now in its second edition focuses on the challenge to Marxism posed by Critical Race Theory as this relates to educational theory policy and practices with respect to both the US and UK Critical Race Theory CRT in the realm of Education has a long history in the US and is now a burgeoning field of inquiry in the UK Critical Race Theory and Education is the first book length response to CRT from a Marxist perspective and looks at CRT's origins in Critical Legal Studies critiques the work of major US and UK Critical Race theorists and also looks at some of CRT's strengths CRT and Marxism are contextualized with respect to both

neo liberal global capitalism and imperialism and to anti racist socialist developments in South America The book concludes with some suggestions for classroom practice      **Africa** ,1970 Includes Proceedings of the Executive council and List of members also section Review of books      **Durkheim** Kieran Allen,Brian O'Boyle,2017-09-20 Emile Durkheim along with Karl Marx and Max Weber is one of the three founding fathers of sociology This is the first book to situate his sociology in the context of his republican politics freeing his ideas from more conventional studies and allowing the reader to see his ideas afresh This critical introduction argues that Durkheim s defence of Republican France in the 1890s had a considerable influence on his sociology which cannot be fully understood when removed from its historical and political context His dismissal of economic factors in suicide rates the influence of his anti feminist position on his findings on marriage rates and the idealism behind his claim that religion is the key determinant in shaping society are all discussed Through analysing his writings including The Division of Labour in Society Suicide and The Elementary Forms of Religious Life this book provides a fascinating critical counterpoint to the existing works on this key figure of sociology      Essential Goals in World Politics Jisi Wang,2021-05-04 This book presents a unique effort to apply political philosophy to realities of the world Among numerous objectives that states politicians and individuals try to reach some are vague like power interest and happiness Some others like democracy order and rule of law are ways and means to serve more fundamental purposes While national reunification is seen as prerequisite on the political agenda of the People s Republic of China and both South and North Korea and religious purity is regarded as essential to many Muslim communities these are not universally accepted principal goals in the world The author identifies and defines security wealth faith justice and freedom as five ultimate goals in world politics and explains why they are central Without jargons and using many cases in China and other countries the author illustrates that different countries at different times have varied priorities in their national politics but they must provide security sustain economic growth set up a value system maintain social justice and secure personal freedom for their citizens Although the world today has been relatively peaceful and accumulated much more wealth as compared to the past centuries vacuums of faith and morality conflicting beliefs and lack of social justice are threatening mankind In theory the five ultimate goals should be reached simultaneously and reinforce each other However in practice they are often in contradiction For example national security might be strengthened at the expense of prosperity and industrialization for economic growth has sacrificed nontraditional security interests such as the environment The accumulation of wealth often results in its unequal distribution and grievances about injustice and freedom and equality are regarded by some political thinkers as natural enemies to each other A virtuous state should be able to reach all the five goals while a bad state may not have even one of them Looking around the world today Denmark in Europe and Japan in Asia are closer to a virtuous state than most other countries despite their own deficiencies but they are generally homogeneous in terms of ethnicity and culture Singapore with its ethnic diversity has to limit freedom to obtain other goals This book compares the development paths of China the United States

and some other countries to demonstrate their advantages and disadvantages in becoming a better polity      **Centrally Planned Economies** Libor Židek, 2019-05-14 Offering a retrospective view of how the system operated in Communist Czechoslovakia this book is an important voice in the discussion about the systems of central planning The unique features of the book include in depth research comprising both archival records and analyses of around 75 interviews conducted with period managers across a wide range of management levels They provided evidence of pervasive inefficiency resulting in appalling economic outcomes The book begins with a background to the politico sociological system in Czechoslovakia and proceeds to describe the Marxist Leninist ideological foundation of the regime which underpinned the formal setting of the Czechoslovak model These initial chapters set the context for the subsequent analysis of the real functioning of the system The book explores the economic outcomes that must be understood as a natural consequence of the ways in which this system operated The author finishes by answering the important question of why centrally planned economies trailed behind the market economies The book s unique use of the interview research format brings a vivid close up view of the everyday economic life in the centrally planned system This will be a valuable contribution to the discussion surrounding the day to day reality of the system which was found to be more colourful than is generally deemed The book will appeal to both economic historians and students of economic history A warning against repeating past mistakes this book will also be of interest to those seeking a greater knowledge of the realities and consequences of centrally planned economies

**Modernism and Totalitarianism** R. Shorten, 2012-11-15 Modernism and Totalitarianism evaluates a broad range of post 1945 scholarship Totalitarianism as the common ideological trajectory of Nazism and Stalinism is dissected as a synthesis of three modernist intellectual currents which determine its particular inherited character      Socialist Optimism Paul Auerbach, 2016-04-08 Paul Auerbach s Socialist Optimism offers an alternative political economy for the twenty first century Present day capitalism has generated growing inequality of income and wealth persistent high levels of unemployment and ever diminishing prospects for young people But in the absence of a positive vision of how society and the economy might develop in the future the present trajectory of capitalism will never be derailed no matter how acute the critique of present day developments The detailed blueprint presented here focuses upon the education and upbringing of children in the context of social equality and household security It yields a well defined path to human development and liberation as well as democratic control of working life and public affairs Socialism as human development gives a unity and direction to progressive policies that are otherwise seen to be a form of pragmatic tinkering in the context of a pervasive capitalist reality      Economics David A. Dieterle, 2017-03-27 A comprehensive four volume resource that explains more than 800 topics within the foundations of economics macroeconomics microeconomics and global economics all presented in an easy to read format As the global economy becomes increasingly complex interconnected and therefore relevant to each individual in every country it becomes more important to be economically literate to gain an understanding of how things

work beyond the microcosm of the economic needs of a single individual or family unit This expansive reference set serves to establish basic economic literacy of students and researchers providing more than 800 objective and factually driven entries on all the major themes and topics in economics Written by leading scholars and practitioners the set provides readers with a framework for understanding economics as mentioned and debated in the public forum and media Each of the volumes includes coverage of important events throughout economic history biographies of the major economists who have shaped the world of economics and highlights of the legislative acts that have shaped the U S economy throughout history The extensive explanations of major economic concepts combined with selected key historical primary source documents and a glossary will endow readers with a fuller comprehension of our economic world A Revised History for Advanced Level & Colleges Nassoro Habib Mbwana,2017-11-10 The book is a response of the suggestions and opinions provided to me by the students on writing a text that could be beneficial for them and other readers The book covers the period from the fifteenth century to the present 2014 It includes the development of Europe from mercantilism to a new imperialism globalization and a neocolonial situation and underdevelopment to the less developed countries in the southern hemisphere It also justifies and revises important areas in the current 2009 syllabus which had been left by other authors in writing history texts for the advanced level Therefore the book justifies some areas that are beyond the syllabus but the questions do appear in examinations The book is directed to be useful for A level and college students the teachers and other readers who have an interest with history **Growing Old in a Better World** Robert Troschitz,2024-09-23 As utopias question social ills and express human wants and unfulfilled dreams they offer insights into the problems desires and ideals of a certain time This book uses this lens to examine cultural representations of ageing and old age in utopian writings from the Renaissance till today The individual chapters offer detailed analyses and interpretations of numerous utopias from Thomas More s Utopia 1516 to contemporary science fiction Through close readings the book explores age related fears and ideals and investigates how perceptions of ageing and the life course as well as attitudes towards older people have developed over the centuries Covering a large time span and a broad range of different utopias the book identifies long term developments and also puts certain dreams such as that of ever lasting youth into a wider perspective It thus enriches both our understanding of the cultural history of ageing and the history of utopian thought The book will appeal to scholars and students from the fields of cultural gerontology and utopian studies as well as literary studies and cultural history more generally
