Fish,Paul R. Fish,M. Elisa Villalpando,2018-07-02 The intriguing hilltop archaeological sites known as cerros de trincheras span almost three millennia from 1250 BC to AD 1450 Archaeologists have long viewed them as a unitary phenomenon because they all have masonry architecture and occur mostly on low volcanic peaks Scattered across the southwestern United States and northwestern Mexico these sites received little comprehensive research until the 1980s This first volume in the Amerind Studies in Archaeology series from the Amerind Foundation documents considerable variability among trincheras sites with respect to age geographic location and cultural affiliation This multi author volume integrates a

remarkable body of new data representing a textbook like array of current research issues and methodologies in the archaeology of the region. Scholars from the United States and Mexico offer original research on trincheras sites in Chihuahua, Sonora, Arizona, and New Mexico. Scales of focus range from intensive intrasite sampling to the largest contiguous survey in the region. Authors incorporate spatial analyses, artifact studies, environmental and subsistence data, ethnographic analogs, ethnohistorical records, cross-cultural comparisons, archaeology, and archival resources. The volume's discussions contribute innovative approaches to worldwide interpretations of landscapes marked by hilltop sites. Contributors present meticulous research arguing that many trincheras sites were primarily used for habitation and ceremonial rites, in addition to previously predominant views of them as defensive refuges. Because trincheras occupations date from the late preceramic era to shortly before Spanish contact, authors relate them to early forms of agriculture, the emergence of village life, the appearance of differentiated settlement systems, and tendencies toward political and ritual centralization. Detailed maps and figures illustrate the text, and close-up aerial photographs capture the visual essence of the sites, highlighted by a section that includes color photographs and an essay by renowned photographer Adriel Heisey. Contributors: Christian E. Downum, Paul R. Fish, Suzanne K. Fish, Robert J. Hard, Adriel Heisey, Stephen A. Kowalewski, Randall H. McGuire, Ben A. Nelson, John R. Roney, Judith Taylor, M. Elisa Villalpando, Joseph Vogel, Henry Wallace, David R. Wilcox, J. Scott Wood.

Early State Economics Henri Claessen, Pieter van de Velde, 2017-09-08. The central theme of this volume is the political economy of early state societies, the ways in which the income of the central government of such systems was collected and spent. The work contains descriptive as well as narrative and commemorative essays. Contributions present data on early states as diverse as the Interlacustrine states of East Africa, the Sudanic states of West Africa, prehistoric Cahokia in the Mississippi Valley, Aztec Mexico, the Classical Maya, eighteenth-century Nepal, and Polynesian Tahiti, and Mayan case studies. At the theoretical end of the spectrum, the book offers a general discussion of the concept of political economy, modes of production in antiquity, and the editors themselves offer an overview of early state organizational forms. With the data of the contributions to this volume, such theoretical viewpoints are evaluated. The conclusion is that inherited approaches fall far short of explaining the political economies of early states. The editors of this volume maintain that much thinking on this issue of the early state is off base because it is confined to the study of redistribution. They hold that a prestige goods system is probably as important, while in some cases the key factor to look at is tribute or taxation. Likewise, the system of gift giving, often viewed as ancillary, should be considered central to the performance of the ancient states. In short, political economy is rooted in the stages of social growth. Nearly all contributors agree that simple evolutionary generalizations can no longer be applied to specific cases without considerable modification, and in this undertaking, formalist and Marxist canons alike need to be invoked for a deeper understanding of the actual operations of the state in earlier societies.

*National Library of Medicine Current Catalog*  
National Library of Medicine (U.S.), **The Fragmentary City** Andrew M. Gardner, 2024-05-15. As Andrew M. Gardner

explains in *The Fragmentary City* in Qatar and elsewhere on the Arabian Peninsula nearly nine out of every ten residents are foreign noncitizens. Many of these foreigners reside in the cities that have arisen in Qatar and neighboring states. The book provides an overview of the Gulf migration system with its diverse migrant experiences. Gardner focuses on the ways that demography and global mobility have shaped the city of Doha and the urban characteristics of the Arabian Peninsula in general. Building on those migrant experiences, the book turns to the spatial politics of the modern Arabian city, exploring who is placed where in the city and how this social landscape came into historical existence. The author reflects on what we might learn from these cities and the societies that inhabit them. In *The Fragmentary City*, Andrew M. Gardner frames the contemporary cities of the Arabian Peninsula not as poor imitations of Western urban modernity but instead as cities on the frontiers of a global neoliberal and increasingly urban future.

*The Ashgate Research Companion to Anthropology* Andrew J. Strathern, 2016-03-03 This companion provides an indispensable overview of contemporary and classical issues in social and cultural anthropology. Although anthropology has expanded greatly over time in terms of the diversity of topics in which its practitioners engage, many of the broad themes and topics at the heart of anthropological thought remain perennially vital, such as understanding order and change, diversity and continuity, and conflict and cooperation in the reproduction of social life. Bringing together leading scholars in the field, the contributors to this volume provide us with thoughtful and fruitful ways of thinking about a number of contemporary and long-standing arenas of work where both established and more recent researchers are engaged. The companion begins by exploring classic topics such as Religion, Rituals, Language, and Culture, Violence, and Gender. This is followed by a focus on current developments within the discipline, including Human Rights, Globalization, and Diasporas, and Cosmopolitanism. It provides an interesting and challenging look at the state of current thinking in anthropology, serving as a rich resource for scholars and students alike.

*Domestic Architecture and the Use of Space* Susan Kent, 1993-06-25 *Domestic Architecture and the Use of Space* investigates the relationship between the built environment and the organization of space. The contributors are classical and prehistoric archaeologists, anthropologists, and architects who, from their different backgrounds, are able to provide some important and original insights into this relationship.

*Science Information News*, 1961

**Historic Zuni Architecture and Society** Thomas John Ferguson, 1996-03 A unique approach to the Zuni Pueblo's history, applying the architectural method of space syntax, linking the structure of Zuni society to the structure of the architecture housing it. Drawing heavily on archeological findings, the volume nonetheless disputes the traditional archeological theory of population change as a basis for the changes in Zuni society but does not offer any clear theories of its own. However, Ferguson, adjunct curator of archeology at Arizona State University, does create a vivid historical architectural analysis of the Zuni culture, society, and social and architectural structure from 1540 to the 1980s. Includes numerous diagrams, illustrations, and photographs.
