Engineering in American Society Raymond H. Merritt, 2014-07-15 Technology which has significantly changed Western man's way of life over the past century exerted a powerful influence on American society during the third quarter of the nineteenth century In this study Raymond H Merritt focuses on the engineering profession in order to describe not only the vital role that engineers played in producing a technological society but also to note the changes they helped to bring about in American education industry professional status world perspectives urban existence and cultural values During the development period of 1850 1875 engineers erected bridges blasted tunnels designed machines improved rivers and harbors developed utilities necessary for urban life and helped to bind the continent together through new systems of transportation and communication As a concomitant to this technological development states Merritt they introduced a new set of cultural values that were at once urban and cosmopolitan These cultural values tended to reflect the engineers experience of mobility so much a part of their lives and their commitment to efficiency standardization improved living conditions and a less burdensome life Merritt concludes from his study that the rapid growth of the engineering profession was aided greatly by the introduction of new teaching methods which emphasized and encouraged the solution of immediate problems Schools devoted exclusively to the education and training of engineers flourished schools such as Rensselaer Polytechnic Institute and Stevens Institute of Technology

Moreover business corporations and governments sought the services of the engineers to meet the new technological demands of the day In response they devised methods and materials that went beyond traditional techniques Their specialized experiences in planning constructing and supervising the early operation of these facilities brought them into positions of authority in the new business concerns since they often were the only qualified men available for the executive positions of authority for the executive positions of America s earliest large corporations These positions of authority further extended their influence in American society Engineers took a positive view of administration developed systems of cost accounting worked out job descriptions defined levels of responsibility and played a major role in industrial consolidation Despite their close association with secular materialism Merritt notes that many engineers expressed the hope that human peace and happiness would result from technical innovation and that they themselves could devote their technological knowledge executive experience and newly acquired status to solve some of the critical problems of communal life Having begun merely as had become the planners and in many cases municipal enterprises which they hoped would turn a land of farms and cities into a social eden

How Society Makes Itself Howard J. Sherman,2006 This radical account of the evolution of political social and economic institutions weaves together strands of anthropology sociology political science history and economics In a highly readable text Howard Sherman explains the interconnections of ideas and economic forces and traces the evolution of social and economic institutions from primitive times to the present Sherman focuses on the myth of inevitable progress in technology and argues that it progresses only when social and economic institutions and dominant ideas encourage it to improve He shows that throughout history technology as a part of the economic forces ebbs and flows to create or undermine existing economic institutions
