**The Social Scientific Study of Jewry** Uzi Rebhun, 2014-03-13 Continuing its distinguished tradition of focusing on central political sociological and cultural issues of Jewish life in the last century this latest volume in the annual Studies in Contemporary Jewry series focuses on how Jewry has been studied in the social science disciplines Its symposium consists of essays that discuss sources approaches and debates in the complementary fields of demography sociology economics and geography The social sciences are central for the understanding of contemporary Jewish life and have engendered much controversy over the past few decades To a large extent the multitude of approaches toward Jewish social science research reflects the nature of population studies in general and that of religions and ethnic groups in particular Yet the variation in methodology definitions and measures of demographic socioeconomic and cultural patterns is even more salient in the study of Jews Different data sets have different definitions for what is Jewish or who is a Jew In addition Jews as a group are characterized by high rates of migration including repeated migration which makes it difficult to track any given Jewish population Finally the question of identification is complicated by the fact that in most places especially outside of Israel it is not clear whether being Jewish is primarily a religious or an ethnic matter or both or neither This volume also features an essay on American Jewry and North African Jewry review essays on rebuilding after the Holocaust Nazi war crimes trials and Jewish historiography and reviews of new titles in Jewish studies

*The Arab Minority In Israel's Economy* Noah Lewin-epstein, Moshe Semyonov, 2019-07-11 The Arab Minority in Israel s Economy considers the Arab population as an integral albeit disadvantaged part of Israeli society Using data from a thirty year period the book looks at Arab participation

in the economy especially in the labor market showing how significant socioeconomic inequality persists despite a fundamental tenet of Israel's declaration of independence asserting equality of political and social rights of all its citizens. Taking an ethnic competition perspective the authors explore the extent of inequality uncovering the institutional and social processes that influence it. They examine the role of local labor markets and individual human resources giving special attention to the growing labor force participation of Arab women. They also consider the gains of the majority Jewish population that have resulted from competition and economic discrimination against Arabs. Although the Arab community in Israel has been studied in the past this book is unique in its detailed analysis of employment activity within and outside of the Arab sector and in examining both Arabs and Jews within the stratification system. The book fosters deeper understanding of Israeli society and of multi ethnic societies more generally.

Urban Socio-Economic Segregation and Income Inequality

Maarten van Ham, Tiit Tammaru, Rūta Ubarevičienė, Heleen Janssen, 2021-03-29 This open access book investigates the link between income inequality and socio economic residential segregation in 24 large urban regions in Africa Asia Australia Europe North America and South America. It offers a unique global overview of segregation trends based on case studies by local author teams. The book shows important global trends in segregation and proposes a Global Segregation Thesis. Rising inequalities lead to rising levels of socio economic segregation almost everywhere in the world. Levels of inequality and segregation are higher in cities in lower income countries but the growth in inequality and segregation is faster in cities in high income countries. This is causing convergence of segregation trends. Professionalisation of the workforce is leading to changing residential patterns. High income workers are moving to city centres or to attractive coastal areas and gated communities while poverty is increasingly suburbanising. As a result the urban geography of inequality changes faster and is more pronounced than changes in segregation levels. Rising levels of inequality and segregation pose huge challenges for the future social sustainability of cities as cities are no longer places of opportunities for all.

Trouble in Utopia

Dan Horowitz, Moshe Lissak, 2012-02-01 This book provides a thorough and detailed examination of Israeli institutions and how they function. It explains the decline in effectiveness of the government and the spread of cultural malaise in the Israel of the eighties. Horowitz and Lissak trace the integrative and disintegrative trends in Israel and show how a society that had laid the foundations for a cohesive Jewish nation state became increasingly vulnerable to centrifugal forces. The book not only reflects a broad and comprehensive approach but also focuses on themes that cut across institutional structures such as the weakening of social and political cohesion in an overburdened polity.
