Language Development James P. Lantolf, Matthew E. Poehner, Merrill Swain, 2018-06-14 The Routledge Handbook of Sociocultural Theory and Second Language Development is the first comprehensive overview of the field of sociocultural second language acquisition SLA. In 35 chapters each written by an expert in the area, this book offers perspectives on both the theoretical and practical sides of the field. This Handbook covers a broad range of topics divided into several major sections including concepts and principles as related to second language development, concept-based instruction, dynamic assessment, and other assessment based on sociocultural theory, SCT literacy and content-based language teaching, bilingual multilingual education, SCT and technology, and teacher education. This is the ideal resource for graduate students and researchers working in the areas of SLA and second language development. **Theories in Second Language Acquisition**

Bill VanPatten, Jessica Williams, 2014-12-22 The second edition of *Theories in Second Language Acquisition* seeks to build on the strengths of the first edition by surveying the major theories currently used in second language acquisition research. This volume is an ideal introductory text for undergraduate and graduate students in SLA and language teaching. Each chapter focuses on a single theory written by a leading scholar in the field in an easy-to-follow style: a basic foundational description of the theory, relevant data or research models used with this theory, common misunderstandings, and a sample study from the field to show the theory in practice. This text is designed to provide a consistent and coherent presentation for those new to the field who seek basic understanding of theories that underlie contemporary SLA research. Researchers will also find the book useful as a quick guide to theoretical work outside their respective domains. *Sociocultural Theory in Second*

Language Education Merrill Swain, Penny Kinnear, Linda Steinman, 2011 In this accessible introduction to Vygotskian sociocultural theory, narratives illuminate key concepts of the theory. These key concepts addressed across seven chapters include mediation, Zone of Proximal Development, collaborative dialogue, private speech, everyday and scientific concepts, the interrelatedness of cognition and emotion, activity theory, and assessment. An eighth chapter provides readers with an opportunity to consider two additional narratives and apply the SCT concepts that they have become familiar with. These narratives come from individuals in a variety of languages, contexts, ages, and proficiencies. We hear from learners, teachers, and researchers. Intended for graduate and undergraduate audiences, this textbook includes controversies in the field, questions for collaborative discussion, and provides references to important work in the literature of second language teaching, learning, and research. This book presents a unique introduction to Sociocultural Theory. Through the telling of fascinating stories, the authors familiarize the reader with the concepts that are central to the theory and, in particular, to how

A Philosophy of Second Language Acquisition Marysia Johnson, 2008-10-01

div

How does a person learn a second language In this provocative book Marysia Johnson proposes a new model of second language acquisition SLA a model that shifts the focus from language competence the ability to pass a language exam to language performance using language competently in real life contexts Johnson argues that current SLA theory and research is heavily biased in the direction of the cognitive and experimental scientific tradition She shows that most models of SLA are linear in nature and subscribe to the conduit metaphor of knowledge transfer the speaker encodes a message the hearer decodes the sent message Such models establish a strict demarcation between learners mental and social processes Yet the origin of second language acquisition is located not exclusively in the learner s mind but also in a dialogical interaction conducted in a variety of sociocultural and institutional settings says the author Drawing on Vygotsky s sociocultural theory and Bakhtin s literary theory she constructs an alternative framework for second language theory research teaching and testing This approach directs attention toward the investigation of dynamic and dialectical relationships between the interpersonal social plane and the intrapersonal individual plane Johnson s model shifts the focus of SLA away from a narrow emphasis on language competence toward a broader view that encompasses the interaction between language competence and performance Original and controversial A Philosophy of Second Language Acquisition offers an introduction to Vygotsky s sociocultural theory and Bakhtin s literary theory both of which support an alternative framework for second language acquisition an examination of the existing cognitive bias in SLA theory and research a radically new model of second language acquisition

Lantolf,Matthew E. Poehner,2014-03-05 Explicating clearly and concisely the full implication of a praxis oriented language pedagogy this book argues for an approach to language teaching grounded in a significant scientific theory of human learning a stance that rejects the consumer approach to theory and the dichotomy between theory and practice that dominates SLA and language teaching This approach is based on Vygotsky s sociocultural theory according to which the two activities are inherently connected so that each is necessarily rooted in the other practice is the research laboratory where the theory is tested From the perspective of language education this is what is meant by the pedagogical imperative Sociocultural Theory and the Pedagogical Imperative in L2 Education Elaborates a new approach to dealing with the relationship between theory and practice an approach grounded in praxis the dialectical unity of theory and

practice Presents an analysis of empirical research illustrating praxis based principles in real language classrooms Brings together cognitive linguistics and sociocultural theory the former provides the theoretical knowledge of language required of praxis and the latter furnishes the theoretical principles of learning and development also called for in a praxis approach Offers recommendations for redesigning teacher education programs Its timely focus on the theory practice gap in language education and its original approach to bridging it put this book at the cutting edge of thinking about Vygotskian sociocultural theory in applied linguistics and SLA
