Sociological Self-images Irving Louis Horowitz, 1969 **The Social Self in Zen and American Pragmatism** Steve Odin, 1996-01-01 This is the first book on East West comparative thought to critically analyze the Zen Buddhist model of self in modern Japanese philosophy from the standpoint of American pragmatism **Handbook of Contemporary Sociological Theory** Seth Abrutyn, 2016-06-22 This Handbook provides the hidden common threads that tie sociological inquiry together and featuring eminent scholars it separates itself from its predecessors in substance and organization Rather than rehashing old debates or longingly gazing at the past this book presents sociologists with new ways of conceptualizing the organization and presentation of sociological theory At the heart of this Handbook's vision is the twin goals of making theory a viable enterprise by reconceptualizing how we teach theory and keeping theory closely tied to its empirical applications Three strategies are offered 1 Elucidating how classic issues like integration or interaction are interrogated today 2 Presenting a coherent vision of the social levels of reality that theorists work on such as communities groups and the self as well as how the coherence of these levels speaks to the macro micro link and 3 Theorizing the social world rather than celebrating theorists or theories that is one can look at how theory is used holistically to understand the constraints the social world places on our lived experience or the dynamics of social change Hence in the second decade of the 21st century it has become clear that sociology is at a crossroads as the number of theorists and amount of theory available is increasingly unmanageable and unknowable by the vast majority of professionals and students As such this Handbook of Contemporary Sociological Theory presents the novice and the expert with the a roadmap for traversing this crossroad and building a more coherent robust and cumulative sociology *Psychology of the Image* Michael Forrester, 2012-12-06 *Psychology of the Image* outlines a theoretical framework bringing together the semiotic concepts developed by Charles Peirce the sociological insights of Ervin Goffman and the psychoanalytic ideas of Jacques Lacan Image studies in fashion advertising photography film studies and psychology have been influenced by these theorists in significant ways The framework presented helps the reader understand how these ideas relate to the study of different domains of the

Advanced Introduction to the Sociology of the Self Zhao, Shanyang, 2022-07-19 Shanyang Zhao provides a unique examination of this evolving topic with a framework to address the common questions: What is self? How is self formed? and Why does self matter? Drawing a fascinating distinction between self and self concept, Zhao regards both as part of a larger constellation named the self phenomenon. He separates social determinants of self from neurocognitive prerequisites of self. Focusing on the social determinants, he reviews how social schemas shape self concept through three intertwined mechanisms and how social resources affect self-conscious action through social position and social capital.
