This book provides a comprehensive study of biography to summarize the standard forms as well as a range of peripheral and expanded forms of auto biography. Discussion and analyses to be done at three levels: namely ontology, typology, and writing. It is drawn from local and international theories in biography in addition to related disciplines in particular for those of the twentieth century and summarizing the experiences of the writing of classics in both Chinese and Western biographical history. The study establishes a theoretical system of biography. This book can serve as a useful reference for postgraduate students and professional readers who are interested in biographical research.

Individualism, Holism and the Central Dilemma of Sociological Theory Jiří Šubrt, 2019-05-13. This book examines individualism and holism, the two interpretive perspectives that have divided sociological theory into two camps. It examines attempts to overcome this antinomy and sets out a new approach to resolving this dilemma via critical reconfigurationism.

Individualized Biography. Combining Individual and Structural Perspective Anna Mikulina, 2020-09-22. Seminar paper from the year 2020 in the subject Sociology. Individual Groups Society grade 1-7. University of Frankfurt/Main. Language: English. Abstract: Understanding factors, mechanisms, and processes of upward and downward mobility in different countries remains an important scientific task of sociology around the world. The dominant approach to social inequality analysis is the structural approach, which places mobility in the context of social structures, ability to reproduce or overcome unequal opportunities. Yet despite prejudice to social mobility in scientific discourse, the reality of modern society emphasizes the role of personal decisions and individual turning points. The theory of individualization, which addresses individual and structural factors together while not contradicting them, has received a great resonance. According to this theory, the importance of structural factors and universal stratification characteristics that determine human life is increasingly weakening in the individual's biography. Stable economic growth, the advancement of the education and social security system, instability in labor markets, and increased flows of transnational migration have weakened class boundaries and increased the diversity of

life opportunities and transitions as well as the role of individual in the creation of own biography and the importance of personal choices forcing a reconsideration of approaches and methods in studies of social mobility The integration of the individual into social mobility research is an important methodological task which solution is closely linked to the development of a life course approach to mobility This approach can be broadly defined as consolidating research on biographies and life stories of individuals families and generations using both quantitative and qualitative methods In the biographical approach a person's life is understood as a result of the reciprocal effects of structural forces and individual actions and can be defined as a series of milestones in life events defined by the social order at each one of which an individual chooses certain social roles and statuses Biographical choices depend also on individual habitus stable patterns of thinking perception and evaluation embedded in the body However the ideologically ambiguous concept of individualization suggests the disintegration of previously existing social forms and the increasing fragility of traditionally important parameters of industrial society such as class culture and self consciousness race and ethnicity gender roles and family

immigrants children are now reaching adulthood in more significant numbers but also reflects the added sophistication and sensitivity of social science surveys In linking theoretical and methodological factors it shows just how much the study of these second generations and their families can be enriched by evolving methodologies This book is open access under a CC BY license
