Poetry and Song in Late Eighteenth Century Germany Margaret Mahony Stoljar, 2025-10-01 The German Lied in the period preceding Mozart is less well known than that of the florescence under Schubert Schumann and Wolf But in Poetry and Song in Late Eighteenth Century Germany originally published in 1985 Margaret Stoljar shows that the songs composed by C P E Bach and his contemporaries have an interest and allure of their own She concentrates her analysis on the interplay of poets and musicians the use made by composers of the work of such distinguished poets as Klopstock and the specific contribution that music was able to make to the reception of the poetry As much a work of social history as of musicology Poetry and Song in Late Eighteenth Century Germany casts a fascinating light on the leisure of the period and place as well as on the development of taste and sensibility that prepared the way for Young Werther The book is illustrated with examples of music

lyrical power of art song a solo song set to a poem in the local language in Western art music style accompanied by piano as a vehicle for creating a localized musical identity while embracing cosmopolitan visions The study of art song reveals both the tension and the intimacy between cosmopolitanism and local politics and culture In 20 essays the book includes overviews of art song development written by scholars from each of the five locales of Japan Korea China Taiwan and Australia reflecting perspectives of both established narratives and uncharted historiography The Art Song in East Asia and Australia 1900 to 1950 proposes listening to the songs of our neighbours across cultural and linguistic boundaries Recognizing the colonial constraints experienced by art song composers it hears trans colonial expressions addressing musical modernity both in earlier times and now Readers of this volume will include musicologists ethnomusicologists singers musicians and researchers concerned with modernity in the fields of poetry and history working within local regional and transnational contexts

Albanian Urban Lyric Song in the 1930s Eno Koço, 2004-04-30 This resource aims to introduce Western audiences to what is perhaps the least known heard or discussed urban folk music in Europe Although this music Albanian urban song is the most prominent of Albanian musical genres it has continuously been overlooked by musicologists in favor of rural folk music Some commentators have implied that Albanian urban music was not as genuinely Albanian as the music of its mountains and countryside But it is no less a part of the country's musical history particularly in the twentieth century and is equally as pure an expression of Albanian spirit and culture The author examines the indigenous diatonic and chromatic modes used in Albanian urban music and classifies them under traditional headings and as part of a newly established grouping here termed south western Balkan modes The core of the work is the analysis of Albanian urban lyric songs seen as an artistic version of the traditional Albanian urban songs When these songs began to enter the classical repertoires the pioneers of the 1930s suggested that based on the Albanian urban songs the new genre should be developed into urban lyric song Whatever its origin whether Near Eastern or south western Balkan the composer arrangers and the lyric singers of the Albanian urban lyric song in the 1930s conceived them on the whole as Western vocal and instrumental products Complemented by two music CDs Albanian Urban Lyric Song in the 1930s provides musicologists students of Balkan music and curious readers with an enlightening discussion of a much overlooked but richly rewarding musical tradition

The Matter of Song in Early Modern England Katherine R. Larson, 2019-08-29 Given the variety and richness of the sixteenth and seventeenth century English songscape it might seem unsurprising to suggest that early modern song needs to be considered as sung When a reader encounters a song in a sonnet sequence a romance and even a masque or a play however the tendency is to engage with it as poem rather than as musical performance Opening up the notion of song from a performance based perspective *The Matter of Song in Early Modern England* considers the implications of reading song not simply as lyric

text but as an embodied and gendered musical practice Animating the traces of song preserved in physiological and philosophical commentaries singing handbooks poetic treatises and literary texts ranging from Mary Sidney Herbert's Psalmes to John Milton's Comus the book confronts song's ephemerality its lexical and sonic capriciousness and its airy substance These features can resist critical analysis but were vital to song's affective workings in the early modern period The volume foregrounds the need to attend much more closely to the embodied and musical dimensions of literary production and circulation in sixteenth and seventeenth century England It also makes an important and timely contribution to our understanding of women's engagement with song as writers and as performers A companion recording of fourteen songs featuring Larson soprano and Lucas Harris lute brings the project's innovative methodology and central case studies to life

The Generation of Meaning in Liturgical Songs Willem Marie Speelman,1995 This book is about the meaning of liturgical songs Everybody who sings liturgical songs knows what a liturgical song is and also what it eans But when we start to talk about them things become confused We know too much and there are too many languages in which we can express what we think their meaning is And what is worse other people seem not to understand what we say and immediately reply that we may know a lot but not what they know Then the discussion turns into a quarrel amongst people who know too much and cannot communicate what they know A wise person may enter into the quarrel and say that communication about liturgical songs can only succeed when we sing together Then we will sing together confused and angry because we now also know that the other people may sing very well but do not understand what they are doing This is what has been happening for decades in the Dutch churches Perhaps we should be silent and start to look and listen very carefully to liturgical songs while developing a language in which the songs themselves can speak communicating what they have to say The looking and listening will take much time and energy there are no more easy answers And the language will be so difficult that we are forced to be silent waiting and hoping for a word to come Willem Marie Speelman 1960 is a musicologist theologian and semiotician In the present work he develops a very strict scientific method which can help to understand how liturgical songs work that is in what manner they generate meaning Island Songs Godfrey Baldacchino,2011-12-08 Through the close analysis of musical performance and tradition the scholarly contributions to Island Songs provide a global review of how island songs their lyrics and their singers engage with the challenges of modernity migration and social change uncovering
