Drawing on war propaganda popular advertising voluminous government records and hundreds of letters and other accounts written by women in the 1940s Melissa A McEuen examines how extensively women s bodies and minds became battlegrounds in the U S fight for victory in World War II Women were led to believe that the nation s success depended on their efforts not just on factory floors but at their dressing tables bathroom sinks and laundry rooms They were to fill their arsenals with lipstick nail polish creams and cleansers in their battles to meet the standards of ideal womanhood touted in magazines newspapers billboards posters pamphlets and in the rapidly expanding pinup genre Scrutinized and sexualized in new ways women understood that their faces clothes and comportment would indicate how seriously they took their responsibilities as citizens McEuen also shows that the wartime rhetoric of freedom democracy and postwar opportunity coexisted uneasily with the realities of a racially stratified society The context of war created and reinforced whiteness and McEuen explores how African Americans grappled with whiteness as representing the true American identity Using perspectives of cultural studies and feminist theory Making War Making Women offers a broad look at how women on the American home front grappled with a political culture that used their bodies in service of the war effort **The British Army and the First World War** Ian

Beckett, Timothy Bowman, Mark Connelly, 2017-05-15 This is a major new history of the British army during the Great War written by three leading military historians Ian Beckett Timothy Bowman and Mark Connelly survey operations on the Western Front and throughout the rest of the world as well as the army s social history pre war and wartime planning and strategy the maintenance of discipline and morale and the lasting legacy of the First World War on the army s development

They assess the strengths and weaknesses of the army between 1914 and 1918 engaging with key debates around the adequacy of British generalship and whether or not there was a significant learning curve in terms of the development of operational art during the course of the war Their findings show how despite limitations of initiative and innovation amongst the high command the British army did succeed in developing the effective combined arms warfare necessary for victory in 1918
