Sorrat John Thomas Richards,1982 Journal of the Fortean Research Center Paperbound Ray Boeche,2012-07-01 The Fortean Research Center was founded in Lincoln Nebraska in 1982 During the two decades of its existence this volunteer group of researchers and investigators delved deep into the unexplained Exploring events in Nebraska and far beyond that included ghosts UFOs Bigfoot encounters animal mutilations government cover ups alleged alien abductions psychic phenomena cult activity and even a sighting of a blob like mystery creature the Fortean Research Center became recognized among members of the Fortean paranormal and UFO research communities around the world as a reliable and trusted source of information Here is the entire collection of the Journal of the Fortean Research Center 23 issues in all These publications are a reflection of their time and demonstrate in many cases the beginning steps into subjects familiar to the public today alleged UFO crashes and landings at government installations alien abductions cryptozoology and more **The Trickster and the Paranormal** George P. Hansen,2001-08-20 Paranormal and supernatural events have been reported for millennia They have fostered history s most important cultural transformations e g via the miracles of Moses Jesus Mohammed Paranormal phenomena are frequently portrayed in the world s greatest art and literature as well as in popular TV shows and movies Most adults in the U S believe in them Yet they have a marginal place in modern culture No university departments are devoted to studying psychic phenomena In fact a panoply of scientists now aggressively denounces them These facts present a deeply puzzling situation But they become coherent after pondering the trickster figure an archaic being found worldwide in mythology and folklore The trickster governs paradox and the irrational but his messages are concealed This book draws upon theories of the trickster from anthropology folklore sociology semiotics and literary criticism It examines psychic phenomena and UFOs and explains why they are so problematical for science Encyclopedia of Occultism & Parapsychology Leslie Shepard,1991 A compendium of information on the occult sciences magic demonology superstitions spiritism mysticism metaphysics psychical science and parapsychology with biographical and bibliographical notes and comprehensive indexes **Mysteries and Secrets Revealed** Loren Pankratz,2021-04-01 Mysteries and Secrets Revealed uncovers the reality behind mysteries of nature and secrets of frauds that eluded common understanding The journey begins in the ancient Greek city of Delphi where priests claimed the gift of a priceless gold lion was an acknowledgement of their clairvoyant powers But their concocted story concealed an embarrassing blunder Those sufficiently savvy to catch the lie became aware of even deeper problems Author Loren Pankratz then guides us through the conflicts of Renaissance scholars including Galileo who explained things in ways that enraged philosophers and infuriated priests Galileo s methods of investigation were perpetuated by the meticulous work of the Academy of Experiment and Bernard Fontenelle s enthralling dialogue enabled common people to accept life in the rearranged sun centered universe Clairvoyants in a mesmeric trance claimed they could visit distant planets and endure brutal surgical procedures If any of

this was real how was it possible One nineteenth century mesmeric savant Alexis Didier was so convincing that someone claimed no case of clairvoyance could be made for anyone if his accomplishments were not real This unchallenged declaration is now unraveled here for the first time through information gleaned from uncommon documents and rare antiquarian pamphlets The surprising manifestations of modern spiritualism quickly escalated into a psychic arms race that included mysterious tipping and turning of tables Scientist Michael Faraday devised ingenious experiments to show how subtle muscle reactions outside of awareness created these manifestations On the other hand explanations for table levitations and mysterious writing on slates could only be solved by individuals with acute observational skills and acquainted with the methods of trickery Each story in *Mysteries and Secrets Revealed* captures the tension of conflict the thrill of discovery and the strategies of science that unmasked frauds fakes false belief and the enigmas of our natural world

Psychics, Sensitives and Somnambules Rodger I. Anderson, 2015-01-27 Claimants of paranormal abilities have always attracted controversy and fascination and sometimes rigorous study by scientists Charles Bailey an Australian medium was seemingly able to materialize different objects animate and inanimate under conditions which made it difficult to conceive how they could have been normally produced Sumitra Singh a woman of Northern India who in 1984 became subject to epileptic type seizures claimed to be possessed by spirits of the dead Franck Kluski was a Polish poet banker and physical medium who specialized in both human and animal materializations This biographical dictionary contains profiles of 330 psychics worldwide from Tony Agpaoa to Elenor Zugun each accompanied by a bibliography listing the primary sources consulted The primary focus is on those claimed psychics who have figured prominently in the history of the subject though some lesser known figures are included to show how rich varied and colorful that history has been The aim throughout is to present each case as fairly and dispassionately as the facts allow with a particular eye for accuracy in details and presentation The approach is historical not apologetic or accusatory making the work ideally suited as a permanent reference

Rawhide Laureate, John G. Neihardt John Thomas Richards, 1983 **Encyclopedia of Pseudoscience** William F. Williams, 2013-12-02 The Encyclopedia of Pseudoscience is the first one volume A to Z reference that identifies defines and explains all of the terms and ideas dealing with the somewhat murky world of the almost sciences Truly interdisciplinary and multicultural in scope the Encyclopedia examines how fringe or marginal sciences have affected people throughout history as well as how they continue to exert an influence on our lives today This comprehensive reference brings together superstitions and fads that are part of popular culture such as fortune telling healing practices once thought marginal that are now become increasingly accepted such as homeopathy and acupuncture frauds and hoaxes that have occurred throughout history such as UFOs mistaken theories first put forward as serious science but later discarded as false such as phrenology and racial typing etc More than 2000 extensively cross referenced and illustrated entries cover prominent phenomena major figures events topics places and associations **The Haunted Boonslick** Mary Collins Barile, 2011-08-23

A slim riveting tome dedicated to the haunts of the Mid Missouri region This book is chock full of history Columbia Daily Tribune There is some uncertainty about the exact borders of the region that surrounds the Boonslick Trail but little doubt about the palpable and unsettling presence of its history Stir up Missourians from St Louis to Jackson County with the mention of ghosts and after a few minutes of demurring you will soon have more stories than you can shake a sheet at Attend to the haunting music of John Blind Boone or the otherworldly poetry of Patience Worth Crouch down in Civil War battlefields crowded taverns or the uncomfortable saddle of a headless horse Wend your way through Missouri s haunted heart the Boonslick Includes photos The book covers a broad history of hauntings and unexplained occurrences since 1812 It is peppered with ghost stories that have very human explanations Missourian Mary Collins Barile gives a history of the area and mentions that these ghost stories are ones that are unknown to outsiders yet important to the history of the region St Louis magazine Randi's Prize Robert McLuhan,2010 James The Amazing Randi is a stage magician who says he has a million dollars for anyone who can convince him they have psychic powers No one has even come close to winning proof say sceptical scientists that there is no such thing as the paranormal But are they right In this illuminating and often provocative analysis Robert McLuhan examines the influence of Randi and other debunking sceptics in shaping scientific opinion about such things as telepathy psychics ghosts and near death experiences He points out that scientific researchers who investigate these things at first hand overwhelmingly consider them to be genuinely anomalous But this has shocking implications for science for society and for even perhaps for ourselves as individuals Hence the sceptics insistence that they should rather be attributed to fraud imagination and wishful thinking However this extraordinary and little understood aspect of consciousness has much to tell us about the human situation McLuhan suggests And at a time when militants are polarising the debate about religion its mystical spiritual element offers an optimistic and enlightened way forward Randi s Prize is aimed at anyone interested in spirituality or those curious to know the truth about paranormal claims It s an intelligent and readable analysis of scientific research into the paranormal which uniquely also closely examines the arguments of well known sceptics **Haunted Columbia, Missouri** Mary Collins Barile,2016-09-05 The author of The Haunted Boonslick proves the Show Me State isn t shy about its ghostly heritage especially in the beautiful college town at its center According to Columbia ghost lore the city s dead only dabble with departure The specter of Broadway legend Maude Adams checks in on classes at Stephens College while ragtime pioneer John William Boone returns to trail invisible fingers along his grand piano Some linger from love like the spirit of the Osage woman who waited for a final walk with the brave she was to marry Others remain for a reckoning like the guerrilla stalking Brannock Hall for the Union sniper who shot him down or the murdered child discovered in the plaster of a frontier tavern From the columns of Mizzou s quad to the region s winding country roads author Mary Collins Barile explores the restless graves of Columbia s eerie heritage Includes photos *Wondrous Events* James McClenon,2016-11-11 James McClenon examines the relationship between wondrous
