Soul Powers And Possibilities 191:

Power and Possibility in Early Arabic Philosophy Nicholas Allan Aubin, 2023-12-31 The world is a finite body and therefore has finite power John Philoponus is remembered for using this Aristotelian premise to break ranks with Aristotle and argue that the world is not everlasting This investigation reconsiders Philoponus's arguments from finite power and then explores the aftermath of this line of thinking in the works of three lesser known Arabic intellectuals active in the generation before Avicenna d 1037 Ab l ayr Ibn Suw r d after 1017 Ab al asan al mir d 992 and Ab Sahl al Mas d after 1025 Each engaged with this dictum in unique and novel ways and in so doing anticipated a number of central features of Avicenna's writings The history of this argument is of crucial importance for understanding the evolution of natural philosophy and metaphysics in this formative period away from tedious and simplistic arguments about creation and towards a more robust modal ontology based on intrinsic and extrinsic necessity Herder's Essay on Being Johann Gottfried Herder, 2018

Presents the first English translation of Herder's foundational essay along with critical responses to it by today's leading Herder scholars **The History and Power of Mind** Richard Ingalese, 1922 **Powers** Julia Jorati, 2021 Why does a wine glass break when you drop it whereas a steel goblet does not The answer may seem obvious glass unlike steel is fragile This is an explanation in terms of a power or disposition the glass breaks because it possesses a particular power namely fragility Seemingly simple such intrinsic dispositions or powers have fascinated philosophers for centuries A power's central task is explaining why a thing changes in the ways that it does rather than in other ways powers should explain why an acorn turns into an oak tree not a sunflower or why fire burns wood and wood can catch fire This volume examines the twists and turns of the fascinating history of a difficult philosophical concept focusing on the metaphysical sense of powers that is the powers that are invoked in the explanation of natural changes and activities Scholars probe the views of thinkers from antiquity to the present day Anaxagoras Plato the Stoics Abelard Anselm Henry of Ghent Gottfried Wilhelm Leibniz Margaret Cavendish Mary Shepherd Immanuel Kant Georg Wilhelm Friedrich Hegel and numerous others In addition the volume contains four short reflection essays that examine the concept of powers from the perspective of disciplines other than philosophy namely history of music West African religions history of chemistry and history of art The history of philosophy brims with controversies surrounding the concept of power and these controversies have not diminished particularly as potentialities or powers see a revival in contemporary analytic metaphysics Hence telling the history of philosophical theories of powers means exploring the trajectory of a concept whose importance to the past and present of philosophy can hardly be overstated

Plato's Power, 2025-02-03 What do we mean when we say that something has power Plato's dialogues are probably the first philosophical corpus to address this question Powers are causes they account for how events happen They are properties that agents have as well as dispositions in those who suffer the effects of an action This explanation is the basis of Plato's metaphysics and moral philosophy He proposed that things are the power they have to act or be acted upon this is

their nature This book brings together a group of specialists to guide the reader through this fascinating theory

Partitioning the Soul Klaus Corcilius, Dominik Perler, 2014-07-28 Does the soul have parts What kind of parts And how do all the parts make together a whole Many ancient medieval and early modern philosophers discussed these questions thus providing a mereological analysis of the soul Their starting point was a simple observation we tend to describe the soul of human beings by referring to different types of activities perceiving imagining thinking etc Each type of activity seems to be produced by a special part of the soul But how can a simple undivided soul have parts Classical thinkers gave radically different answers to this question While some claimed that there are indeed parts thus assigning an internal complexity to the soul others emphasized that there can only be a plurality of functions that should not be conflated with a plurality of parts The eleven chapters reconstruct and critically examine these answers They make clear that the metaphysical structure of the soul was a crucial issue for ancient medieval and early modern philosophers
