Dungy has selected 180 poems from 93 poets that provide unique perspectives on American social and literary history to broaden our concept of nature poetry and African American poetics This collection features major writers such as Phillis Wheatley Rita Dove Yusef Komunyakaa Gwendolyn Brooks Sterling Brown Robert Hayden Wanda Coleman Natasha Trethewey and Melvin B. *AIDS Narratives* Steven F. Kruger, 2013-10-28 This is the first book length study of the rich fiction that has emerged from the AIDS crisis Examining first the ways in which scientific discourse on AIDS has reflected ideologies of gender and sexuality such as the construction of AIDS as a disease of gay men part of a battle over masculinity and thus largely excluding women with AIDS from public attention the book considers how such discourses have shaped narrative understandings of AIDS On the one hand AIDS is seen as an invariably fatal weakening of an individual s bodily defenses a depiction often used to reconfirm an identification between disease and a weak and vulnerable gayness On the other hand AIDS is understood in terms of an epidemic attributable to gay immorality or unnaturalness The fiction of

AIDS depends upon these two narratives with one major subgenre of AIDS novel presenting narratives of personal illness decline and death and a second focusing on epidemic spread These novels also question the narrative structures upon which they depend intervening particularly against the homophobia of those structures though also sometimes reinforcing it *A House Called Tomorrow* Michael Wieggers, 2023-02-28 Copper Canyon Press celebrates its first 50 years of poetry publishing in anticipation of the next 50 years Poetry is vital to language and living This anthology celebrates 50 years of Copper Canyon Press publications one extraordinary poem at a time Since its founding Copper Canyon has been entirely dedicated to publishing poetry books here Editor in Chief Michael Wieggers invites press staff and board past and present to help curate a retrospective The result is a collection of beloved poems from books spanning half a century representing Pulitzer Prize winning books debut collections works in translation and rare books from Copper Canyon s early days This book is a tribute to Copper Canyon poets and readers everywhere because as Gregory Orr writes Certain poems In an uncertain world The ones we cling to They bring us back *Our Deep Gossip* Christopher Hennessy, 2013-11-29 This book presents interviews with eight gay men who are celebrated American poets and writers discussing their early lives friends and communities that shaped their work histories of gay writers before them how sex and desire connect with artistic production and what coming out means to a writer *A Critical Introduction to Law and Literature* Kieran Dolin, 2007-03-15 Despite their apparent separation law and literature have been closely linked fields throughout history Linguistic creativity is central to the law with literary modes such as narrative and metaphor infiltrating legal texts Equally legal norms of good and bad conduct of identity and human responsibility are reflected or subverted in literature s engagement with questions of law and justice Law seeks to regulate creative expression while literary texts critique and sometimes openly resist the law Kieran Dolin introduces this interdisciplinary field focusing on the many ways that law and literature have addressed and engaged with each other He charts the history of the shifting relations between the two disciplines from the open affiliation between literature and law in the sixteenth century Inns of Court to the less visible links of contemporary culture Originally published in 2007 this book provides an accessible guide to one of the most exciting areas of interdisciplinary scholarship *Literature, Race, and Ethnicity* Joseph T. **The Lever of Riches** Joel Mokyr,1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity *The Lever of Riches* with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
