On Losing the Soul Richard K. Fenn, Donald Capps, 1995-07-01 The social scientific literature on the self has been marred by a general indifference to the levels of the self that escape observation The literature on the one hand makes claims about the extent of individualism in American society or claims to see a narcissistic social character widespread in the American public On the other hand very little is known about the self at levels that escape observation but these are the levels at which the self is both most vulnerable and we argue most vital In this volume the notion of the soul is put forward as a hypothesis with which to challenge social sciences to explore the self at depths well beyond that of social relationships

The Ethics of Interpersonal Relationships Joyce Catlett, Robert W. Firestone, 2018-03-28 Writing this book springs from a deep feeling for people and a grave concern that without a proper understanding of the reasons for their inhumanity in relation to one another and the development of a compassionate world view it is likely that human beings may eventually destroy themselves and life on the planet This work is an attempt to explain the source of destructive behaviour and how it manifests itself in personal relationships between men women couples and families and in the social arena The author presents a position that offers a hope of altering the destiny of humankind's unethical behavior through better psychological understanding and education Understanding the source of a person's aggressiveness in defending the fantasy bond and learning to cope with the voice process have strong implications for child rearing and better mental health practices

The Psychological Assessment of Abused and Traumatized Children Francis D. Kelly, 1999-03-01 The past decade has seen more and more clinicians involved in the assessment and treatment of abused and traumatized children They have contributed to an impressively large body of literature on the impact of abuse and trauma at all ages the focus of which has been the short and long term sequelae apparent in the child's behavior emotional experience and social interaction But there have been few efforts to investigate the ways in which abuse and trauma damage the intrapsychic systems and structures that often guide direct and inform the child's manifest adjustment and functioning The need to redress the balance was the major impetus for this book Kelly offers a clinical paradigm for the personality assessment of abused or traumatized children via projective instruments the TAT and Rorschach and shows how various projective measures and indices can be utilized as sensitive barometers of changes in self object and ego functioning following therapeutic interventions and other corrective experiences But further integrating the tenets of trauma theory and those of psychoanalytic theory he sets this clinical paradigm in a meaningful theoretical context and draws on both theory and clinical experience to develop a comprehensive psychological composite of the child who has been maltreated Part I provides an overview of theoretical models relevant to the assessment and diagnosis of the maltreated child Contemporary psychoanalytic theory serves as one frame and is discussed first with particular emphasis on object relations and ego functions Equal attention is devoted to developmental psychology as another frame Part II reviews relevant research The Mutuality of Autonomy Scale MOA and the Social Cognition and Object Relations Scale SCORS are introduced as examples of reliable and valid instruments readily employed to assess the impact of abuse or trauma on a child's object relations functioning Additional Rorschach indices boundary disturbance measures thought disorder indices trauma markers and defensive functions measures are discussed as measures of the impact on different facets of ego functioning These various projective measures can be utilized as sensitive barometers of changes in self object and ego functioning following therapeutic interventions and other corrective experiences Part III includes a variety of extended clinical illustrations Seven cases of boys and girls subjected to varying degrees of abuse and trauma are presented to demonstrate the clinical utility of projective material for assessment diagnosis and treatment planning For the clinician who takes the idiographical phenomenological approach appropriate given the uniqueness of each situation of abuse or trauma and the frequent brevity and barrenness of the protocol such material can open a window onto a

rich vista of the child's psychological terrain. The resulting map can point the way to wise decisions about type, timing and level of therapeutic intervention. The resolution of such process issues as transference and countertransference plus additional questions. Two cases of adult women who were abused as children and find themselves continuing to struggle with enduring unresolved issues vis-à-vis their own children are also presented. These cases underscore the value of TAT and Rorschach material and object relations measures in assessing and understanding the abusive and potentially abusive parent.

Terra Incognita Joseph Isaac Abrahams, 2014-09-07 Terra Incognita provides an autobiographical account of Joseph Abrahams' 75-year career as a psychoanalyst with extensive scientific data, life-altering discoveries and insightful conclusions. Religious Melancholy and Protestant Experience in America Julius H. Rubin, 1994 This thought-provoking study examines an apparent paradox in the history of American Protestant evangelical religion: fervent believers who devoted themselves completely to the challenges of making a Christian life who longed to know God's rapturous love all too often languished in despair, feeling forsaken by God. Indeed, some individuals became obsessed by guilt, terror of damnation and the idea that they had committed an unpardonable sin. Ironically, those most devoted to fostering the soul's maturation seemingly neglected the well-being of the psyche. Drawing upon many sources including unpublished diaries, spiritual narratives and case studies of patients treated in nineteenth-century asylums, Julius Rubin thoroughly explores religious melancholy as a distinctive stance toward life, a grieving over the loss of God's love and an obsession and psychopathology associated with the spiritual itinerary of conversion. The varieties of this spiritual sickness include sinners who would fast unto death, evangelical anorexia nervosa, religious suicides and those obsessed with unpardonable sin. From colonial Puritans like Michael Wigglesworth to contemporary evangelicals like Billy Graham, Rubin shows that religious melancholy has shaped the experience of self and identity for those who sought rebirth as children of God. Religious Melancholy and Protestant Experience in America offers a fresh and revealing look at a widely recognized phenomenon. It will be of interest to scholars and students of religious studies, American history, psychology and sociology of religion.

Betrayal Salman Akhtar, 2018-05-01 Betrayal underlies all psychic trauma, whether sexual abuse or profound neglect, violence or treachery, extramarital affair or embezzlement. When we betray others, we violate their confidence in us. When others betray us, they pierce the veil of our innocent reliance. Betraying and feeling betrayed are ubiquitous to the scenarios of trauma and yet surprisingly neglected as a topic of specific attention by psychoanalysis. This book fills this gap. The first part deals with developmental aspects and notes that while the experience of betrayal might be ubiquitous in childhood, its lack of recognition by the parents is what leads to fixation upon it. Attention is also given to Oedipally indulged

and seduced children who feel betrayed later in the course of their development Feelings of betrayal during early adolescence are also discussed This section of the book closes with an account of situations where our bodies betray us The realms of body image betrayal body self betrayal and the body s ultimate betrayal via physical death are addressed
