Telling Wonders:

Telling Wonders Rosaria Vignolo Munson, 2001 A sharp analysis of how Herodotus narrative participates in the rhetoric of shaping public attitudes about the present **Shaping the Geography of Empire** Katherine Clarke, 2018-05-31 This volume explores the spatial framework of Herodotus Histories the Greek historian's account of Persian imperialism in the sixth and fifth century BC and its culmination in a series of grand expeditions against Greece itself Focusing on his presentation of the natural world through careful geographical descriptions ranging from continents and river and mountain networks on a vast scale down to the local settings for individual episodes it also examines how these landscapes are charged with greater depth and resonance through Herodotus use of mythological associations and spatial parallels Man's interaction with and alteration of the physical world of the Histories adds another critical dimension to the meaning given to space in Herodotus work as his subjects own agency serves to transform their geography from a neutral backdrop into a resonant landscape with its own role to play in the narrative in turn reinforcing the placing of the protagonists along a spectrum of positive or negative characterizations The Persian imperial bid may thus be seen as a war on nature no less than on their intended subjects however as Herodotus reflects Greece itself is waiting in the wings with the potential to be no less abusive an imperial power Although the multi vocal nature of the narrative complicates whether we can identify a Herodotean world at all still less one in which moral judgements are consistently cast the fluid and complex web of spatial relationships revealed in discussion nevertheless allows focalization to be brought productively into play demonstrating how the world of the Histories may be viewed from multiple perspectives What emerges from the multiple worlds and world views that Herodotus creates in his narrative is the mutability of fortune that allows successive imperial powers to dominate as the exercise of political power is manifested both metaphorically and literally through control over the natural world the map of imperial geography is constantly in flux *Cosmopolis* Daniel S. Richter, 2011-04-15 This book examines the ways in which various intellectuals in the post classical Mediterranean imagined the human community as a unified homogenous whole composed of a diversity of parts More specifically it explores how authors of the second century CE adopted and adapted a particular ethnic and cultural discourse that had been elaborated by late fifth and fourth century BCE Athenian intellectuals

Lovecraft Donald R. Burleson, 2021-05-11 Howard Phillips Lovecraft 1890-1937 has been described variously as the successor to Edgar Allan Poe a master of the Gothic horror tale and one of the father of modern supernatural fantasy fiction Published originally in pulp magazines his works have *Tacitus' Wonders* James McNamara, Victoria Emma Pagán, 2022-02-10 This volume approaches the broad topic of wonder in the works of Tacitus encompassing paradox the marvellous and the admirable Recent scholarship on these themes in Roman literature has tended to focus on poetic genres with comparatively little attention paid to historiography Tacitus whose own judgments on what is worthy of note have often differed in interesting ways from the preoccupations of his readers is a fascinating focal point for this complementary

perspective Scholarship on Tacitus has to date remained largely marked by a divide between the search for veracity as validated by modern historiographical standards and literary approaches and as a result wonders have either been ignored as unfit for an account of history or have been deprived of their force by being interpreted as valid only within the text While the modern ideal of historiographical objectivity tends to result in striving for consistent heuristic and methodological frameworks works as varied as Tacitus Histories Annals and opera minora can hardly be prefaced with a statement of methodology broad enough to escape misrepresenting their diversity In our age of specialization a streamlined methodological framework is a virtue but it should not be assumed that Tacitus had similar priorities and indeed the Histories and Annals deserve to be approached with openness towards the variety of perspectives that a tradition as rich as Latin historiographical prose can include within its scope This collection proposes ways to reconcile the divide between history and historiography by exploring contestable moments in the text that challenge readers to judge and interpret for themselves with individual chapters drawing on a range of interpretive approaches that mirror the wealth of authorial and reader specific responses in play
