A History of the Office and Office Work Rob Harris, 2025-04-08 This book brings together the office and office working as an economic construct as a business function as a building type and as a mode of work It explores social and economic relations and it traces the evolution of work and the environment and equipment needed to support it over the last 400 years In so doing it helps to fill a void in popular understanding of the office The role of the office has been examined over the past three years in ways that it has never been examined before Whilst the existential crisis arising from COVID 19 has settled somewhat there remain big questions over the future of office workers and office real estate This book is a timely well researched and fascinating contribution to the debate Rob Harris explores how the nature of work has changed and continues to change placing the events surrounding COVID 19 into a longer term perspective and asking what is the future of the office Will it go through a radical reinvention How will office work evolve in the future Whither office buildings The book emphasises the continuum of change and that today's events are simply the latest stage of change rather than something entirely novel This book will be of interest to anyone with a stake in the built environment whether as an investor occupier owner manager or advisor It is equally accessible to those with a non technical background including students on courses such as economic history economics geography real estate and urban planning

The Architecture of Andrew Thomas Taylor Susan Wagg, 2013-04 How Andrew Thomas Taylor advanced the quality of architecture in Canada *Colonial Architecture and Urbanism in Africa* Fassil Demissie, 2016-12-05 Colonial architecture and urbanism carved its way through space ordering and classifying the built environment while projecting the authority of European powers across Africa in the name of science and progress The built urban fabric left by colonial powers attests to its lingering impacts in shaping the present and the future trajectory of postcolonial cities in Africa Colonial Architecture and Urbanism explores the intersection between architecture and urbanism as discursive cultural projects in Africa Like other colonial institutions such as the courts police prisons and schools that were crucial in establishing and maintaining political domination colonial architecture and urbanism played a pivotal role in shaping the spatial and social structures of African cities during the 19th and 20th centuries Indeed it is the cultural destination of colonial architecture and urbanism and the connection between them and colonialism that the volume seeks to critically address The contributions drawn from different interdisciplinary fields map the historical processes of colonial architecture and urbanism and bring into sharp focus the dynamic conditions in which colonial states officials architects planners medical doctors and missionaries mutually

constructed a hierarchical and exclusionary built environment that served the wider colonial project in Africa
