Offering speculation upon the creation of future educational possibilities for all this book stories both an initial event leading to a sixteen year old student's withdrawal from a Further Education college on her first day and an imaginary second chance to support her at university ten years later Animating potential for intensities and becoming in writing this work exemplifies different approaches to writing which foster inquiry and speculation to trouble academic constraints capable of acting as a barrier to so many Writing in counterpoint to the traditional map of the academic thesis literature non methodologies and ethics are imbricated in this book which readers are invited to read in non linear ways choosing from multiple entryways and exits This book will be of particular interest to undergraduate and postgraduate students and doctoral supervisors in Education as well as practitioners involved in supporting students writing Perhaps most crucially the book will provoke entry into provocations within and research creative inventions that extend the continuing emergence of post qualitative inquiry
