Careless State Mark Considine,2022-10-05 The lives of all Australians are profoundly affected by the quality of social services available but a long list of royal commissions and public inquiries have revealed them to be failing In The Careless State Mark Considine shows that the preferred model of reform has failed to adapt and improve In the 1980s Australian governments faced rapidly increasing demand for services in areas like employment assistance aged care childcare and vocational education and training to respond to this challenge governments led by Bob Hawke and Paul Keating pioneered the introduction of service markets where private companies compete with public institutions and charities in newly constructed social services This choice revolution was embraced and extended by the Howard government Market choice continues to drive reform across a wide spectrum of programs and social services Considine s detailed investigation demonstrates conclusively that important aspects of the experiment with social service markets have failed Weak quality control systematic sorting and entrenched disadvantage have become the norm Private business interests and shareholders interest have often displaced established charities and commitment to quality care for all The service systems are careless leaving clients to make choices without real information or protection Considine points to alternative ways that reforms could be configured to get the best from both private and public agencies and find a new approach to save these failing services

Renewable Energy Auctions Anton Eberhard,Wikus Kruger,2023-11-06 Renewable Energy Auctions provides an overview of renewable energy

auctions globally focusing on the Global South since this is where auctions have been pioneered and provided most transformative results Renewable energy auctions have become the dominant method for contracting utility scale renewable energy projects in large part due to the cost efficient tariffs secured through this method The ascent of auctions has been particularly rapid and transformative in the Global South where many countries have secured renewable energy supplies at record breaking prices This book analyses the experiences of frontier auction markets in Latin America sub Saharan Africa and India with the aim of improving how auctions are designed and implemented globally The book goes beyond the topic of auction design which is concerned with the micro economics of design choices to include auction implementation Across ten chapters the authors argue that choices around the auction implementing institution and the procurement process are overlooked in most publications on the subject yet this is often a key factor for determining outcomes Moving beyond the program level of analysis auction design and implementation the book includes both country and project level factors impacts on auction outcomes ultimately highlighting that successful price and investment outcomes are dependent upon integration of all three levels of auction design and implementation

Success Strategies and Knowledge Transfer in Cross-Border Consulting Operations Roger Svensson, 2012-12-06 Success Strategies and Knowledge Transfer in Cross Border Consulting Operations analyzes the international operations of consulting firms Apart from developing a theoretical framework which differs from traditional theories about international trade the main issues analyzed in this book are 1 Success determinants when tendering for international consulting contracts 2 The choice between exports acquisition of a local firm or establishing a greenfield office when entering foreign markets 3 The extent and nature of knowledge transfer to emerging markets 4 The role of development agencies in international consulting projects 5 The trend towards and consequences of more management services included in international projects 6 The effects on competition when state owned consulting firms are allowed to operate in the international market The empirical analysis of these issues is based on a unique database of individual tender documents which Swedish consulting firms have submitted abroad
