Beck, 2005-07-25 No two lizard species have spawned as much folklore wonder and myth as the Gila Monster *Heloderma suspectum* and the Beaded Lizard *H. horridum* the sole survivors of an ancient group of predacious lizards called the Monstersauria More like snakes on legs monstersaurs are a walking contradiction they are venomous yet don't appear to use their venom for subduing prey their mottled patterns mingle with the broken shadows and textures of their desert and tropical dry forest habitats yet their bright open mouths hiss a bold warning that a nasty bite awaits those who advance further And while Gila Monster venom produces excruciating pain it also contains a peptide that has become a promising new drug for treating type 2 diabetes Perhaps the ultimate paradox is that monstersaurs are among the most famous of lizards yet until quite recently they have remained among the least studied With numerous illustrations stunning color photographs and an up to date synthesis of their biology this book explains why the Monstersauria seems poised to change the way we think about lizards Daniel D Beck who has been investigating Gila Monsters and Beaded Lizards for over 22 years teams up here with award winning wildlife photographer Tom Wiewandt to produce a comprehensive summary of this small but remarkable family of lizards **The Lizard's Bite** David Hewson, 2024-05-14 Welcome to Italian police detective Nic Costa's Rome the side of the city the tourist board does not want you to see Hewson does more than provide a thrilling read He saves you the airfare to Italy When you turn the last page you'll think you've been there LINWOOD BARCLAY David Hewson's Rome is dark and tantalizing seductive and dangerous a place where present day crimes ring with the echoes of history TESS GERRITSEN David Hewson is one of the finest thriller writers working today STEVE BERRY No author has ever brought Rome so alive for me nor made it seem so sinister PETER JAMES Hewson is a master plot maker BOOKLIST _____ In Venice the world's most beguiling city someone has made an art of murder In exile in Venice after offending people they shouldn't have Detective Nic Costa and his partner Gianni Peroni are offered a chance to return to Rome All they have to do is wrap up an apparently open and shut murder case on the island of Murano where a glassmaker killed his wife and subsequently died himself when his furnace exploded The pair investigate but as they dig more deeply into the insular glass making community and the strange Arcangeli family things don't quite add up With increasing pressure from above to come to a conclusion the detectives are increasingly sure is a cover up events spiral

"Venomous" Bites from "Non-Venomous" Snakes Scott A Weinstein, David A. Warrell, Daniel E Keyler, 2022-08-10 Venomous Bites from Non Venomous Snakes Second Edition thoroughly examines the potential hazards associated with bites by non front fanged snakes popularly but inaccurately called rear fanged snakes This diverse group contains approximately 80% of living snake species approximately 2 900 species A large proportion of these snakes were previously assigned to the family Colubridae but as a consequence of expanding systematics investigations have been split into multiple families and subfamilies Many of these snakes produce venoms or oral secretions that contain toxins and other biologically active substances A large variety of non front fanged snakes figure in the pet industry yet little documented information or formal study of their potential medical importance has been published Therefore although the possible medical importance of many of these species has been subjected to speculation since the mid 19th century there is a limited amount of useful descriptive information regarding the real hazard or lack thereof of this wide variety of snakes The first edition of this book provided one stop shopping by offering information regarding their possible toxicity and clinical relevance as well as recommendations for medical management of their bites The second edition expands and updates the content with detailed information about the effects and medical management of bites by a broad representation of non front fanged species The hypothetical venomous nature of some lizards considered as non venomous such as the Komodo monitor or dragon and their allies as well as the medical effects of their bites is also examined The dynamic taxonomy of advanced snakes is updated and the bases for some of these fluid changes are discussed Likewise terminology is also updated in order to reflect the ongoing debates regarding the definition of venom and the balanced reinforcement of nonmedical criteria used to define the biological basis of the term venomous Fills a gap in toxicological medical and herpetological literature by providing a comprehensive review of this entire assemblage of non front fanged snakes with particular attention given to their capacity to cause harm to humans Offers a patient centered evidence based approach which is applied to analyzing documented case reports of bites inflicted by a broad

representation of species Provides expanded and updated detailed information on the clinical management of medically significant bites from non front fanged snakes which is also methodically reviewed and specific recommendations are provided Includes updates of the fluid taxonomy of advanced snakes and also of terminology with particular regard to the definition of venom and the nonmedical criteria used to define the biological basis of the venomous condition in snakes and lizards

Marc Deveroux Ronald Wintrick, 2020-12-16 Science fiction space opera Action adventure humor romance and a lot more Excerpt Take a sedative Melanie I have to stay awake now If you could be so kind as to bring me about five stimulants first I be greatly appreciative Then before you go to sleep some food I can t take the chance of going to the galley myself I said Just going to the head is going to be risk enough There was a head right outside the bridge but even that was a dangerous risk Unfortunately it was a risk I was going to have to take unless I wanted to soil myself Unfortunately sometimes desperate times called for desperate measures but that one I just wouldn t be able to do She made three trips the third trip was my fifth stimulant and her bottle and glass I had given her permission to drink as long as I was awake and there was absolutely nothing for her to do anyway Her only job would be to sit in that co pilots seat when I was asleep and wake me if it became necessary We were going to be living on the bridge The only good thing I could say about that was that my captains chair did recline Melanie managed to get four drinks down before the sedative took her away hopefully to sweet dreams I got up and reclined her seat for her which didn t even come close to waking her I picked at the food she had brought me over a period of hours not wanting to fill my stomach A full stomach would have the effect of tiring me and that I couldn t afford to let happen Nine hours later Whelan was on the com Still awake Still here Whelan I know you said twelve hour shifts but I just had a good sleep and I know you have to be tired Whelan said So I ll take over now for a twelve and you can do a twelve next time Get some sleep Marc Try to sleep for a solid twelve if you can I thought that was possible actually as tired as I was Melanie was stretching I noticed our conversation having woken her I looked at her and her eyes were open Use the doc Go get yourself about five stimulants Get enough food to last the day and use the head You re about to be on deck No talk of reluctance today she rose to do as bid She had a healthy desire to live That was clear enough I connected com to the ships stereo system and put the volume on high If Whelan had a sudden warning to give I was definitely going to wake up Then I poured a cognac Three would be my limit but no sedatives It wouldn t even be close to getting me drunk but it would help me get to sleep without the sedatives I definitely could not take sedatives I needed to be

able to wake up if it became necessary Our ships were in passive mode Everything that we could afford to power down was powered down If the Tssah passed over our crevice it was possible they might not notice us before it was too late The guns held residual charges maybe a few shots from each and hope that was enough while I brought the ship back to life to continue fighting should that be necessary She that even be possible I amended I really had no idea just how advanced they were Certainly not the most advanced but certainly more advanced than we were Melanie came back with stimulants and food on a tray she had found and saw the drink in my hand I thought you weren't going to get drunk I'm not I said Just a few I can't afford to take a sedative My shift starts again in twelve hours Try not to make noise and I'm going to try to sleep all the way through I take it Whelan is doing his twelve now Melanie said He is but I have consistently been a better fighter I'm going to need you to be on point Melanie This is truly serious This is as serious as it gets I know you'll be bored but this is our lives and we won't get second chances I understand I'll be awake and I'll be sitting right here the whole time unless I have to use the head and there's nothing I can do about that except try and make it quick I told her about the com being connected to the stereo system drank my drinks and not surprisingly fell fast asleep I only got up once to use the head Good to her word Melanie was awake and alert next to me And sober The co pilot had the same console I had including access to the guns If I took control of my console it overrode hers I used the head and watched for a moment while she did the same I had another drink and back asleep I slept a total of about nine hours When I awoke rested I unhooked the stereo from com used the doc made stimulants and got something to eat Then I was back on the bridge Melanie did of course know how to use the guns and was very good There was a practice program that was just like the real thing to help acclimate a person to this particular system and she was nearly as good as me maybe just as good She was after all a gunner by trade Whelan had a little over two hours left of his shift so added to my twelve hour shift it was a total of fourteen hours I would have to be alert Perfectly doable If you want to drink go right ahead I said I'm basically on duty for the next fourteen hours I thought you'd never ask Melanie said She picked up a half empty bottle filled her glass and drank it down I watched enviously
