Moutafakis, 2012-12-06 With characteristic incisiveness Georg Henrik von Wright identifies *prohairetic logic* i.e. the logic of preference as the core of a general theory of value concepts Essentially this nucleus involves the logical study of acts from the point of view of their preferability ¹ italics added Though the term *prohairesis* is found in Plato as well as in Aristotle's treatment of the relations of preference it is von Wright who introduces this word into contemporary analytical philosophy and succinctly specifies the philosophical dimensions it encompasses The above emphasis upon the philosophical study of the formalization of preferences is a matter of utmost importance for understanding the type of inquiry this investigation attempts to initiate Over the past one hundred years the literature on general theories of subjective utility has become massive where one considers the work done in psychometrics econometrics statistical theories probability theories etc etc Histories in these areas are strong in tracing various evolutions in the development of the concept of preference in decision making However what has not been investigated with sustained attention are the fundamentally philosophical inquiries into the formalization of preference relations *The Logic of Preference* Georg Henrik von Wright, 1971 *The Logic of Decision and Action* Nicholas Rescher, 2010-11-23 The four main essays in this volume investigate new sectors of the theory of decision preference act characteristics and action analysis Herbert A Simon applies tools developed in the theory of decision making to the logic of action and thereby develops a novel concept of heuristic power Adapting ideas from utility and decision theory Nicholas Rescher proposes a logic of preference by which conflicting theories proposed by G H von Wright R M Chisholm and others can be systematized Donald Davidson discusses difficulties in specifying the structure of action sentences to elucidate how their meaning depends on that structure G H von Wright devises a method for describing each state of the world that results from an action in a revision of his own earlier work Additionally a study of the logic of norms by Alan Ross Anderson is presented as an appendix along with an appendix by Rescher outlining the aspects of action **The Logic of Preference** Georg Henrik von Wright, 1963
