The Logic Of Welfare Reform:

The Logic of Welfare Reform Frank Levy, 1980 To find more information about Rowman and Littlefield titles please visit www.rowmanlittlefield.com **Building Better Social Programs** David Stoesz, 2020 Building Better Social Programs situates evidence based policymaking with respect to the welfare state describes key organizations driving the evidence based movement and proposes innovations designed to extend benefits to the working class In addition to providing case studies of cost effective programs delivering positive outcomes this volume will include interviews with luminaries who have propelled the evidence based policy movement **The Logic of Welfare Reform** Brianne Russell-Morris, 2009 Those involved in creating contemporary welfare reform legislation in the United States have boasted that the legislation the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 PRWORA has been successful in removing recipients from the cash assistance welfare rolls and thus from the State's responsibility Yet many analysts believe it has granted the State more invasive control over welfare recipients of cash assistance even while reducing its role in providing a social safety net for them Abramovitz 2000 Mink 1998 Neubeck 2006 Smith 2007 This reconfiguration of State regulation of low income women and children who are the majority of cash assistance recipients involves a contradiction between the promotion of dependency on a male breadwinner via heterosexual marriage or mandatory participation in paternity establishment and child support enforcement and the promotion of self sufficiency through low wage work This thesis analyzes the logic behind this major change in welfare policy specifically by examining the legislative process leading up to the 2006 welfare reform reauthorization legislation to determine if this contradiction has been recognized or not within mainstream poverty discourse The thesis explores how policymakers and those working with policymakers verbally justified the contradiction in order for it to be written into law by analyzing the State's discourse on poor women leading up to the reauthorization of this reform An original feminist textual analysis of several Congressional hearings leading up to the February 8 2006 reauthorization of PRWORA under the Deficit Reduction Act of 2005 is presented This feminist analysis focused on an examination of the processes by which a text is produced such as Congressional hearings and contains two elements 1 a critical interrogation and deconstruction of the welfare reform discourse as it might be gendered racialized and classed in spite of policymakers and witnesses presentation of the welfare recipient as an asexual disembodied citizen and 2 an analysis of not only what is there but what is missing and possibly presumed by the policymakers and polity alike Most policymakers and hearing witnesses did not perceive these two aspects of welfare reform to be contradictory but rather to be complementary As the ideology of the work and family ethics continues to constitute the logic of welfare reform and to infuse its resulting discourse the reality that work alone or dependency on a male breadwinner alone does not reduce poverty for most low income women and children leads policymakers and their supporting witnesses to press for both simultaneously

Assessing the Balance of Power in Central-Local Relations in China John Donaldson, 2016-07-01 How do we

understand the evolution of central local relations in China during the reform period This book addresses this question by focusing on eight separate issues in which the central local relationship has been especially salient government finance investment control regional development administrative zoning implementation culture social welfare and international relations Each chapter introduces a sector and the way the center and various local governments have shared or divided power over the different periods of China's reform era The balance of power is gauged dynamically over time to measure the extent to which one level of government dominates influences or shares power in making decisions in each of these particular domains as well as what is likely to occur in the foreseeable future The authors assess the winners and losers of these changes among key actors in China's society The result provides a dynamic view of China's changing power relations

Single Mothers and the State Celia Winkler, 2002-05 U S welfare rights activists have long envied women in Sweden who benefited from social policies that made the incidence of poverty among children and solo mothers among the lowest in the world This situation has begun to change with the rise of neoliberalism in Sweden from the late 1970s to the middle of the 1990s social policy that had once dramatically improved the lives of solo mothers began to give way to policies that privatized their problems Solo mothers in the United States were worse off as conservative policymakers launched a clamorous campaign to restore the traditional nuclear family as the only guarantor of women's and children's well being blaming solo mothers for everything from juvenile crime to their own poverty In this revealing and timely book sociologist and former legal services attorney Celia Winkler charts the policies in Sweden and the United States that transformed the social and economic situation of solo mothers who are an early warning of more general danger the canary in the coal mine

The Political Economy of the Small Welfare State in South Korea Jae-jin Yang, 2017-09-28 This book explains why the Korean welfare state is underdeveloped despite successful industrialization democratization a militant labor movement and a centralized meritocracy Unlike most social science books on Korea which tend to focus on its developmental state and rapid economic development this book deals with social welfare issues and politics during the critical junctures in Korea's history industrialization in the 1960-70s the democratization and labor movement in the mid 1980s globalization and the financial crisis in the 1990s and the wind of free welfare in the 2010s It highlights the self-interested activities of Korea's enterprise unionism at variance with those of a more solidaristic industrial unionism in the European welfare states Korean big business the chaebol accommodated the unions call for higher wages and more corporate welfare which removed practical incentives for unions to demand social welfare Korea's single member district electoral rules also induce politicians to sell geographically targeted narrow benefits rather than public welfare for all while presidents are significantly constrained by unpopular tax increase issues Strong economic bureaucrats acting as veto player also lead Korea to a small welfare state
