The Lovelock Version Maurice Shadbolt, 1980 *Spiritcarvers* Antonella Sarti, 2022-06-08 In a land caught between the sea and cloud where the natural landscape still refuses civilization there are those the composers of words tellers of tales that help shape the minds of the people that live on its shores They are spiritcarvers New Zealand writing today is engaging in an intent struggle to subvert multiple shapes into voices These interviews as a record of biographical orature are shaped into presenting the figure of the storyteller through memory and language explorations of how we imagine and create ourselves with and into words Here we encounter the dichotomy of fiction and non fiction myth and consensual reality imagination and truth do we live within our own selected fictions Identity is shaped by the authors sense of displacement as well as of belonging meeting otherness with dispossession discovering connection through isolation Among the focal points of the interviews are the role of women s writing Maori writing interrelations among different cultures and the influence of literary and oral tradition within New Zealand **James Lovelock** John Gribbin, Mary Gribbin, 2021-07-13 In 1972 when James Lovelock first proposed the Gaia hypothesis the idea that the Earth is a living organism that maintains conditions suitable for life he was ridiculed by the scientific establishment Today Lovelock s revolutionary insight though still extremely controversial is recognized as one of the most creative provocative and captivating scientific ideas of our time James Lovelock tells for the first time the whole story of this maverick scientist s life and how it served as a unique preparation for the idea of Gaia Drawing on in depth interviews with Lovelock himself and unprecedented access to his private papers John and Mary Gribbin paint an intimate and fascinating portrait of a restless uniquely gifted freethinker In a lifetime spanning almost a century Lovelock has followed a career path that led him from chemistry to medicine to engineering to space science He worked for the British secret service and contributed to the success of the D Day landings in World War II He was a medical experimenter and an accomplished inventor And he was working with NASA on methods for finding possible life on Mars when he struck upon the idea of Gaia conceiving of the Earth as a vast living self regulating system Deftly framed within the context of today s mounting global warming crisis James Lovelock traces the intertwining trajectories of Lovelock s life and the famous idea it brought forth which continues to provoke passionate debate about the nature and future of life on our planet **Modifications of Einstein's Theory of Gravity at Large Distances** Eleftherios

Papantonopoulos, 2014-11-04 In the last few years modified gravity theories have been proposed as extensions of Einstein s theory of gravity Their main motivation is to explain the latest cosmological and astrophysical data on dark energy and dark matter The study of general relativity at small scales has already produced important results cf e g LNP 863 Quantum Gravity and Quantum Cosmology while its study at large scales is challenging because recent and upcoming observational results will provide important information on the validity of these modified theories In this volume various aspects of modified gravity at large scales will be discussed high curvature gravity theories general scalar tensor theories Galileon theories and
