Architectural Conservation in Europe and the Americas John H. Stubbs, Emily G. Makaš, 2011-05-04 From such well known and long vexed sites as the Athenian Acropolis to more contemporary locales like the Space Age Modernist capital city of Brasilia the conflicting and not always neatly resolvable forces that bear upon preservation are addressed as clearly and thoughtfully as the general reader could hope for New York Review of Books an astonishing feat of research compilation and synthesis Context The book delivers the first major survey concerning the conservation of cultural heritage in both Europe and the Americas Architectural Conservation in Europe and the Americas serves as a convenient resource for professionals students and anyone interested in the field Following the acclaimed Time Honored this book presents contemporary practice on a country by country and region by region basis facilitating comparative analysis of similarities and differences The book stresses solutions in architectural heritage protection and the contexts in which they were developed [The cultural & heritage guide for Slovakia](#) ,2025-09-24 **The Carpathians: Integrating Nature and Society Towards Sustainability** Jacek Kozak, Katarzyna Ostapowicz, Andrzej Bytnerowicz, Bartłomiej Wyżga, 2013-04-15 The book includes a broad spectrum of perspectives from different scientific disciplines both the natural and social sciences as well as practical knowledge It gives a new insight into the Carpathian mountain region **Cultural Heritage of East Central Europe** Wojciech Roszkowski, 2015-01-02 The concept of culture is a relatively modern invention It stems from the Latin term cultura meaning cultivation Cicero was the first to use this word in a non agricultural context In his Tusculanae Disputationes he reflected on the cultivation of the soul cultura animi Later this term was rarely used in this sense but as of the 17th century more and more authors considered culture an intellectual and not an agricultural phenomenon Samuel Pufendorf 1632 1694 described culture as a vehicle overcoming natural barbarism He was followed by German philosophers of culture Johann Gottfried Herder 1744 1803 argued that human creativity was as important as human rationality and called attention to national cultures The works of German romantic philosophers were mainly focused on the specificity of the German culture a factor that was to unite divided German statehoods At the same time however Herder and his followers noticed other national cultures including first of all those of East and Central Europe It is therefore noteworthy that the early philosophical reflection on culture was closely connected with the specific traditions of East and Central Europeans [Legal & Financial Aspects of Architectural Conservation](#) Marc Denhez, Stephen Dennis, 1997-07-01 How do governments design their strategy for heritage property What do they try to accomplish in their laws and their tax systems to favour the re use of older buildings districts and cities What institutional framework can assist the restoration of tourist designations and the conservation of neighbourhoods In this international study eighteen experts from ten countries describe the legal challenges and solutions relating to such property Beyond a carefully described theoretical framework actual case studies demonstrate how communities and countries can make adjustments to their legislation so that older buildings can be better protected This
