Docking, Jennifer Stock, 2017-07-14 As our global demographic shifts towards an increasingly aging population, we have an opportunity to transform how we experience and think about getting older and embrace the diversity and contribution that this population can bring to society. The International Handbook of Positive Aging showcases the latest research and theory into aging, examining the various challenges faced by older adults and the ways in which we can bring a much needed positive focus towards dealing with these. The handbook brings together disparate research from medical, academic, economic, and social community fields, with contributions from NHS partners, service users, universities across the United Kingdom, and collaborations with international research leaders in the field of aging. Divided into sections, the first part of the book focuses on introducing the concept of positive aging, before going on to cover the body over the life course, well-being, and care delivery. All contributors recognise the fact that we are living longer, which is providing us with a tremendous opportunity to enjoy and flourish in healthy and fulfilling later lives, and this focus on the importance of patient empowerment is integral to the book. This is a valuable reference source for those working in developmental psychology, clinical psychology, mental health, health sciences, medicine, neuropsychological rehabilitation, sociology, anthropology, social policy, and social work. Hamric, Judith A. Spross, Charlene M. Hanson, 2008-07-02 Covering all advanced practice competencies and roles this book offers strategies for enhancing patient care and legitimizing your role within today's health care system. It covers the history of advanced practice nursing, the theory behind the practice and emerging issues. Offering a comprehensive exploration of advanced practice nursing, this edition also adds a focus on topics including the APN scope of practice, certification and the ethical and legal issues that occur in clinical practice. The development of all major competencies of advanced practice nursing is discussed: direct clinical practice, consultation, coaching, guidance, research, leadership, collaboration and ethical decision making. Advanced practice competencies are discussed in relation to all advanced practice nursing and blended CNS/NP roles: case manager, acute care nurse practitioner, highlighting the shared aims and distinctions of each role. In-depth discussions on educational strategies explain how competencies develop as the nurse's practice progresses. A chapter on research competencies demonstrates how to use evidence-based research in practice and how to promote these research competencies to other APNs. A conceptual framework shows the clear relationship between the competencies, roles and challenges in today's health care environment. Practical strategies are provided for business management, contracting and marketing. Comprehensive information covers the essential competencies of the new Doctor of Nursing Practice degree. More exemplars/case studies provide real-life scenarios showing APN competencies in action. A new chapter shows how to provide reliable and valid data to substantiate your impact and justify equitable reimbursement for APN services, also enhancing your skills in quality improvement strategies, informatics and systems thinking. Information on telehealth considerations covers the new sources of electronic healthcare information available to patients and describes how to counsel them on using reliable resources.

Although advance directives have been widely discussed since the 1980s, the ethical bases of advance directives still remain a matter of heated debates. The book aims to contribute to these controversial debates by integrating fundamental ethical issues on advance directives with practical matters of their implementation. Cultural, national and professional differences in how advance directives are understood by health care professions and by patients as well as in laws and regulations are pinpointed.
