

Chapter 1

Introduction to Managerial Accounting

ANSWERS TO QUESTIONS

1. The primary difference between financial and managerial accounting is the intended user of the information. Financial accounting is used by external parties such as investors, creditors, and regulators, while managerial accounting is used by internal business managers.
2. Different users will have different information needs, which give rise to many other differences between financial and managerial accounting. Financial accounting includes standardized financial statements that are objective, reliable, and historic in nature. These reports are prepared on a periodic basis and are reported at a highly aggregate level, for the company as a whole. Managerial accounting information is much broader in nature and can encompass budgets, performance evaluations, and cost accounting reports. The information tends to be more subjective and future-oriented in nature and must be relevant to the particular decision the manager is trying to make. The information in these reports tends to be more detailed and segmented, depending on the manager's area of responsibility.
3. GAAP-based financial statements, which are prepared for external parties, will not necessarily be useful for internal managerial decision making. Managers often need more detailed information than is included in historically oriented financial statements. They may need the information broken down by division, business segment, or product line. In addition, managers are typically more interested in what will happen in the future, as opposed to the past. Even if the information is not as objective and verifiable as what would be included in a financial report (for example, it may include more budgeted or forecasted data), managerial accounting information must be relevant to the particular decision the manager is trying to make.
4. Service companies sell services (non-tangible items) to consumers or other businesses. Merchandising companies sell finished goods that they have purchased from someone else. Manufacturing companies make a product using raw materials, then sell it to another manufacturer, merchandising company, service company, or individual consumer.

Management Accounting and Control Michel Charifzadeh, Andreas Taschner, 2017-10-30 Management accounting has been the basic toolbox in business administration for decades Today it is an integral part of all curricula in business education and no student can afford not to be familiar with its basic concepts and instruments At the same time business in general and management accounting in particular is becoming more and more international English clearly has evolved as the lingua franca of international business Academics students as well as practitioners exchange their views and ideas discuss concepts and communicate with each other in English This is certainly also true for management accounting and control Management Accounting is becoming more and more international Management Accounting and Control is a new textbook in English covering concepts and instruments of management accounting at an introductory level primarily at the Bachelor level but also suited for general management and MBA courses due to a strong focus on practical relevance This textbook covers all topics that are relevant in management accounting in business organizations that are typically covered in German and Central European Bachelor courses on management accounting and control After a general introduction to the field of management accounting and control the book discusses cost management as an extension of cost accounting Typical cost management instruments such as target costing life cycle costing and process based costing approaches are explained in detail Differences between Anglo American activity based costing ABC and German process based costing are highlighted The book then turns to an extensive discussion of planning and budgeting tasks in management accounting with a strong focus on the practical application of the topic such as developing a budget in practice Another chapter is dedicated to a comparison of traditional budgeting with modern alternative budgeting approaches A major part of the book is dedicated to the broad area of performance management The relevance of financial statement information for performance management purposes is discussed in detail In addition the most widely spread financial performance indicators are illustrated using real world examples The book also includes detailed content on value based management control concepts In a consecutive chapter performance measurement is linked with strategy while extensively discussing the Balanced Scorecard as a key tool in strategic performance management The remaining parts of the book deal with management reporting as one of the main operative tasks in management accounting practice The book closes with insight into new fields and developments that currently influence management accounting practices and research and promise to play an increasingly important role in the future

Management and Cost Accounting Andreas Taschner, Michel Charifzadeh, 2020-09-01 Management and cost accounting has been the basic toolbox in business administration for decades Today it is an integral part of all curricula in business education and no student can afford not to be familiar with its basic concepts and instruments At the same time business in general and management accounting in particular is becoming more and more international English clearly has evolved as the lingua franca of international business Academics students as well as practitioners exchange their views and

ideas discuss concepts and communicate with each other in English This is certainly also true for cost accounting and management accounting Management Accounting is becoming increasingly international Management and Cost Accounting is a new English language textbook covering concepts and instruments of cost and management accounting at an introductory level Bachelor but also suited for MBA courses due to strong focus on practical applications and cases This textbook covers all topics that are relevant in management accounting in business organizations and that are typically covered in German and Central European Bachelor classes on cost accounting and management accounting After an introduction to the topic including major differences between the German approach and the purely Anglo Saxon approach of management accounting the book describes different cost terms and concepts applied in German cost accounting The book is much more specific here compared to US American standard textbooks Based on different cost concepts the topic of cost behavior is discussed including the determination of cost functions The heart of the book guides the reader through the general structure of a fully developed cost accounting system following the German and Central European standard It starts with cost type accounting moves on to cost center accounting and finally deals with cost unit accounting assigning cost to goods and services offered in the market The remaining parts of the book deal with decision making and how management and cost accounting data can support managers in this task A comparison of absorption costing and variable costing introduces the reader to management decisions such as product portfolio and outsourcing decisions Additionally cost volume profit analysis break even analysis is covered The book closes with a comprehensive treatment of cost planning and variance analysis

Environmental Management Accounting and Supply Chain Management Roger L. Burritt, Stefan Schaltegger, Martin Bennett, Tuula Pohjola, Maria Csutora, 2011-05-19 This volume's focus on the environmental accounting of supply chain processes is of particular relevance because these processes supply data about the environmental impact of relationships between business organisations an area where the boundary separating internal and external accounting is ill defined Here contributors advocate what they term accounting for cooperation as a more environmentally positive complement to the paradigmatic practice of accounting for competition

Handbook of cost and management accounting Zahirul Hoque, 2010-05-28 In order to survive in the changing business environment organisations should rethink their strategic philosophy and the role of management accounting The primary focus of this book is on techniques and concepts of cost and management accounting for strategic business decisions It focuses on both conventional and contemporary issues The book will serve as a reference source for practicing accountants senior executives and managers working in human resources operations and accounting divisions As the principal focus of this book is on conceptual foundations it would also be ideal for courses in graduate programs such as master's degree MBA or Executive MBA

Corporate Finance takes an applied approach to cover all the latest research and topic areas important to students taking Finance courses. The new edition provides an international perspective on all areas of corporate finance and has been updated to include discussion on current trends such as the integrated nature of global supply chains, financial risk management and key regulatory changes impacting the sector. It addresses the impact that FinTech, the climate and geopolitics are having on the development of corporate finance. It considers the questions brought about by the global coronavirus pandemic and looks to the future of the industry. Understanding and Application: Clear, user-friendly style. Example boxes in every chapter provide hypothetical examples to illustrate theoretical concepts such as cash flow timing, dividend smoothing and differential growth. Real World Insight boxes use companies like Apple, Volkswagen and Adidas to show how they have applied corporate finance theories and concepts to their business decisions. Chapter links throughout provide quick cross referencing to show the connections between topics. Practice and Proficiency: Mini and Practical cases present scenarios and questions to practice application and learning. Questions and Problems in each chapter, categorised by topic and level of difficulty, allow for rigorous testing of the chapter content. Numbered maths equations and key notation boxes listing the variables and acronyms that will be encountered in each chapter designed to encourage mastery of Maths. Exam Questions designed to take 45 minutes and test you on material learned in a more formal exam style. Connect resources include algorithmic questions designed to ensure equations and calculations are not learned by rote but by thorough understanding and practice. New to This Edition: Sustainability in Action boxes draw on issues relating to the environment, society, the economy and climate change to show how corporate finance is so important to the resolution of sustainability challenges. Updated discussions and new sections on sustainable value added, green bonds, dividend policy and share repurchases. Islamic Financing, intangible valuation and the differential value method.
