Small Business Agenda Trends In A Global Economy:

Business America ,1986 Includes articles on international business opportunities Small Businesses Trickling Up in Central and Eastern Europe Galen Spencer Hull,2013-01-11 First published in 1999 Small businesses now constitute the most dynamic element of growth in the emerging markets of the Central and Eastern European region This book argues that the small and medium sized enterprise SME sector has contributed more to the growth of these countries in transition than have privatized state enterprises and the public sector In 1989 most of the countries of Eastern and Central Europe were still under an economic system dominated by state owned enterprises Since then a process of liberalization has been unleashed to promote free market policies This has involved programs of privatization and restructuring of public enterprises as well as the promotion of policies to enable a private sector to develop Small businesses are creating thousands of new jobs while large companies are retrenching and downsizing their work force In some countries of the region this process is much further along than in others However the SME sector has developed at a more rapid pace than has the privatization of the large public companies There has been a flurry of new enterprises springing up throughout the region which are trickling up in a frequently hostile environment against tremendous odds and yet managing to have a pronounced impact on their respective economies Small businesses have taken over in sectors that used to be dominated by big enterprises primarily in services and consumer products They have provided a crucial outlet for pent up entrepreneurial talent that had remained dormant during the long period of state domination This work urges legislators policy makers and development agencies alike to take account of the importance of the SME s in their legislation and planning Given a more favorable environment these small businesses will provide even greater impetus for economic growth Equally important is for entrepreneurs themselves to be convinced of the rightness of their path in societies that have traditionally looked down upon profit seekers as unscrupulous and selfish If the CEE region is to achieve its full potential of economic growth policies and support mechanisms to promote the SME sector will be needed to assure a favorable environment A Small Business Agenda Galen Hull,1986 Offering an approach to the problems faced by development countries this book demonstrates that a policy that encourages an active small business sector in these countries may be the most productive form of international development assistance **Transnational Business** Galen Spencer Hull,2022-03-26 First Published in 1999 Small Businesses Trickling Up in Central and Eastern Europe argues that micro small and medium sized enterprises in selected countries of Central and Eastern Europe CEE have been the key to economic growth rather than privatized large scale enterprises Small businesses have come to constitute the most dynamic element of growth in the emerging markets of the CEE region in the last decade In 1989 most of the countries of the region were still under the political and economic domination of the Soviet Union Since then a process of liberalization has been unleashed in the region to dismantle statist economic policies and replace them with free market policies This has involved programs of privatization and restructuring of

state owned enterprises as well as the promotion of policies to enable a private sector to develop Small businesses are creating thousands of new jobs while large companies are retrenching and downsizing their workforce In some countries of the region this process is much further along than in others In each country however the small and medium enterprise SME sector has developed at a more rapid pace than has the privatization of the large public companies The privatization of small and medium sized state owned enterprises has been rather more successful With the economic transition there has been a flurry of new enterprises springing up throughout the region some registered as legal entities but many micro enterprises often remaining unregistered in the informal sector Micro enterprises are increasingly seen as an important element of this SME sector although they were traditionally treated separately as belonging to the informal sector and a detriment to economic growth
