**Ecosystem Planning in Florida** Samuel David Brody, 2016-04-29 While ecosystem management requires looking beyond specific jurisdiction and focusing on broad spatial scales most planning decisions particularly in the USA are made at local level By looking at land use planning in Florida this volume recognizes the need for planners and resource managers to address ecosystem problems at local and community levels The factors causing ecosystem decline such as rapid urban development and habitat fragmentation occur at the local level and are generated by local land use policies This book argues that understanding how local jurisdictions can capture and implement the principles of managing natural systems will lead to more sustainable levels of environmental planning in the future

**Florida** Jeff Rice, 2015-04-01 This collection proposes Florida as a nexus of various contested moments ideas concepts and relations In the age of networks it is not enough to only think of computerized economic or labor intensive systems as networks Florida is both a site of exploration what does Florida mean and a model for spatial work in general how do we trace out the networked connections of a given space Florida taps into an existing conversation regarding space and it contributes a new approach by offering up the state as a network of both objective and personal meanings

*Geo-Spatial Technologies in Urban Environments* Ryan R. Jensen, Jay D. Gatrell, Daniel McLean, 2007-05-11 I was introduced to cities as ecosystems by the late Professor Forest Stearns University of Wisconsin Milwaukee who was an early pioneer in the studies of the urban ecology in the 1970s I still recall the various terms Urban ecosystem Urban zones Urban corridors Megacities or Megacities complexes and Megalopolis used by various discipline experts as they grappled with the complex of all the terrestrial habitats the city Cities have been humanity's habitat since ancient times and one can find references to the cities even in biblical writings and other ancient texts from many parts of the world So what is different now It is the rate of global urbanization that has brought urban systems and urban environments into focus once again This has captured our attention in the past several months For example the British Broadcasting Corporation News BBC news devoted a series of highly educational programs titled *Urban planet* in July 2006 I was impressed with the breadth and the depth of urban issues discussed in the series and the fact that many academic and government experts were featured to provide an assessment of the current state of global urbanization The United Nations reports that increased urbanization has created a range of serious issues including access to

clean water sanitation shelter urban poverty HIV AIDS and problems with urban governance not to mention the issues related to urban environments
