**Management for a Small Planet** Stead, 2015-05-18 When this classic text was first published in 1992 it provided a unique focus for the burgeoning concern for sustainability and sustainable organizational practices. The book's impact continues to be felt today as large multinational corporations are making substantial commitments to the triple bottom line of economic success, social responsibility, and environmental protection, and sustainability has become a part of curricula in business schools around the globe. Featuring extensive new material throughout, this new edition of *Management for a Small Planet* maintains the same unique vision and approach that made the original so influential. Unlike other texts on the topic, it employs a strategic general management perspective within theoretical frameworks on how organizations can be instrumental in moving humankind toward a more sustainable world. Part I includes chapters dedicated to each dimension of sustainability: biophysical, economic, and social. Part II contains the specifics on the formulation and implementation of sustainable management practices, all grounded in the principles of organizational behavior, leadership, and business strategy. The book is an ideal text for any course concerned with environmental management and sustainable management practices.

Frances Moore Lappé is one of the few people who can credibly be said to have changed the way we eat, and one of an even smaller group to have done it for the better. *The New York Times* In 1971 *Diet for a Small Planet* broke new ground, revealing how our everyday acts are a form of power to create health for ourselves and our planet. This extraordinary book first exposed the needless waste built into a meat-centered diet. Now in a special edition for its 50th anniversary, world-renowned food expert Frances Moore Lappé goes even deeper, showing us how plant-centered eating can help restore our damaged ecology, address the climate crisis, and move us toward real democracy. Sharing her personal journey and how this revolutionary book shaped her own life, Lappé offers a fascinating philosophy on changing yourself and the world that can start with changing the way we eat. This new edition features eighty-five updated plant-centered recipes, including more than a dozen new delights from celebrity chefs including Mark Bittman, Padma Lakshmi, Alice Waters, Joselyn Bryant, Terry Mollie Katzen, and Sean Sherman.

**Dwell**, 2007-05 At *Dwell* we're staging a minor revolution. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.
