*Making Sense of Our Senses Gr. K-1* , Engaging Jesus with Our Senses Jeannine Marie Hanger, 2024-08-27 Jesus took on flesh he was embodied And the Gospels use multisensory language to reveal that his teaching ministry and interactions with people engaged the senses Consider the raging storm on the Sea of Galilee the perfume filling the house as Mary anointed Jesus s feet the significance of touch as Jesus healed people Jesus even described himself in sensory terms as the bread of life the light of the world the vine to whom his disciples are connected Our physical senses are crucial to gaining knowledge of the world around us Yet when it comes to Bible reading we often reduce it to a mere cognitive experience ignoring the Psalmist s invitation to taste and see that the Lord is good This book offers a fresh way to read the Gospels with an emphasis on embodiment focused on a life abiding in Christ The goal is a greater more tangible knowledge of God Jeannine Hanger points to the importance of engaging our physical senses in Bible reading shows an approach to doing so with an emphasis on sparking the imagination and looks at how utilizing our primary senses plays out in reading the Gospels Each chapter includes sensory practices and questions for personal reflection The book includes a foreword by Grant Macaskill Senses and Your Abilities Ed Hardy, Sean Hardy, 2008-03 There are many books on the market for the exercise of the body and quite a few on mental exercises This book offers the first everyday exploration on sensory training With trained senses new worlds open up to the reader Colors become brighter Sounds become sweeter Different tastes form on

the palette In essence not only will the user of this book enjoy their reading experience but will gain tangible results from it Senses and Your Abilities is book written in a simple and fluid but highly readable style The guiding principle was that the book be easy to read and a pleasure to read The authors believe this book will be of greatest benefit to anyone unaware of much of the untapped power within their senses This book will help them to unlock those abilities The book will especially appeal to seniors With our increasing lifespans more people are becoming familiar with the tragic consequences on an inactive mind late in life By keeping one s mind alert and constantly busy with new exercises these things may be staved off A wondrous world of sight and sound will unfurl before the more mature readers of this book exciting the brain and the senses on a daily basis Senses and Your Abilities challenges to reader to get off their couch and explore the world around them Whether it is inhaling the scents of homemade brews of tea or paying attention to the shades of colors of parked cars these are exercises that everyone and anyone can perform Most importantly these exercises are simple enough that most can be done in a few minutes so the reader will never get frustrated at lack of results Indeed this book aims to open up the minds of its readers to the amazing processes going on throughout their bodies every time they sniff their coffee or run a hand across a silk shirt This book is up to date and makes use of the latest scientific knowledge on the workings of our brains and senses Senses and Your Abilities is both educational and motivational

*The Hidden Power of Smell* Paul A. Moore,2015-08-27 The main

purpose of the book is to provide insight into an area that humans often take for granted. There are wonderful and exciting stories of organisms using chemical signals as a basis of a sophisticated communication system. In many instances, chemical signals can provide more detailed and accurate information than any other mode of communication, yet this world is hidden from us because of our focus on visual and auditory signals. Although we have a diversity of senses available to us, humans are primarily auditory and visual animals. These stimuli are sent to the more cognitive areas of our brain where they are immediately processed for information. We use sounds to communicate and music to excite or soothe us. Our vision provides us with communication, entertainment, and information about our world. Even though our world is dominated by other stimulus energies, we have chosen in an evolutionary sense either auditory or visual signals to carry our most important information. This is not the case for most other organisms. Chemical signals mediated through the sense of smell and taste are typically more important and are used more often than other sensory signals. The world of communication using chemicals is an alien world for us. We are unaware of how important chemical signals are to other organisms, and we often overlook the influence of chemical signals in our own life. Part of this naivete about chemical signals is due to our cultural focus on visual and auditory signals, but a larger part of our collective ignorance is the lack of information about chemical communication in both popular and scientific writings. The popular press and popular writings virtually ignore the chemical senses, especially in regard to their role or influence for humans and our human culture. Academic books and textbooks are no better.

[Aging And Senses](#) Liam Brown, AI, 2025-03-12. [Aging and Senses](#) explores the changes in sight, hearing, taste, smell, and touch as we age, revealing how these sensory shifts influence our lives. It highlights how sensory decline, often underestimated, significantly impacts our well-being and independence as we get older. Interestingly, sensory changes aren't just about physical decline; they also affect cognitive function, emotional health, and social interactions. The book starts by explaining how each sense functions in early adulthood, then details specific age-related changes, such as presbycusis (age-related hearing loss) and changes in taste and smell. It argues that while some sensory decline is inevitable, lifestyle choices and interventions can make a real difference. The book emphasizes that we can actively engage in maintaining our sensory health, providing evidence-based strategies like dietary recommendations, sensory training, and assistive technologies to mitigate sensory decline. It is designed for older adults, caregivers, healthcare professionals, and anyone interested in gerontology and sensory science.

**Exiled From Our Bodies** Tereza

Stehlíková,2025-09-30 In an era where digital devices increasingly mediate our perception of reality this book explores the tension between the richness of direct sensory experience and the allure of the screen It examines how our growing dependence on virtual spaces and visually dominant media has led to a disconnect from our bodies and environment contributing to a sense of alienation both personal and ecological Drawing on an autoethnographic approach artistic research methods and ethnographic interviews with experts across numerous disciplines this book argues for the continuing importance of lived embodied multi sensory experience It considers how the arts rather than merely reinforcing technological mediation can actively subvert the passivity imposed on our subjectivity by the latter offering creative strategies to re engage with the world through all our senses By using artistic processes to navigate the tension between the virtual and the real the book explores how creative practices can generate new ways of seeing feeling and understanding At its core this work suggests that to even begin to address the current environmental crisis we must first return to our bodies and come back to our senses literally and figuratively Through artistic experimentation philosophical inquiry and sensory exploration it proposes a reawakening to the reciprocity between body technology and environment offering a pathway towards a more conscious engaged and aesth ethical way of inhabiting the world **More Savoring God** Kathleen

**Between Our Ears** Terry Radford, 2010-10-06 For many years professional psychologists have written books about our personal mental make up Unfortunately and almost without exception these works use vocabulary outside of a understanding of the average person and as a result are incomprehensible to him We would all like to understand the structure and contents of our mind better and this book is written for them The book is written using simple English using everyday vocabulary augmented by IT terminology the only language common to the whole world This book will also enable you to understand the building blocks of your minds structure and why you think as you do why there are apparent conflicts in your belief system why you behave in a certain manner how you perceive yourself and how others perceive you It also examines your own character and personality and explains why you are what you are This book further explores how we speak how we remember things and how we interface with our five senses and with external media such as books and electronic information systems It also explores our belief systems why they change as we mature and why they contain apparent dichotomies By reading this book you will fully understand how and why your mind functions and enable you to understand the character and behavior of others This will enable the reader to fully understand why others say and do as they do

**Flavor: The Science of Our Most Neglected Sense** Bob Holmes, 2017-04-25 A journey into the surprising science behind our flavor senses Can you describe how the flavor of halibut differs from that of red snapper How the taste of a Fuji apple differs from a Spartan For most of us this is a difficult task flavor remains a vague undeveloped concept that we don t know enough about to describe or appreciate fully In this delightful and compelling exploration of our most neglected sense veteran science reporter Bob Holmes shows us just

how much we're missing. Considering every angle of flavor from our neurobiology to the science and practice of modern food production, Holmes takes readers on a journey to uncover the broad range of factors that can affect our appreciation of a fine meal or an exceptional glass of wine. He peers over the shoulders of some of the most fascinating food professionals working today, from cutting-edge chefs to food engineers to mathematicians investigating the perfect combination of pizza toppings. He talks with flavor and olfactory scientists who describe why two people can experience remarkably different sensations from the same morsel of food and how something as seemingly unrelated as cultural heritage can actually impact our sense of smell. Along the way, even more surprising facts are revealed: that cake tastes sweetest on white plates, that wine experts' eyes can fool their noses, and even that language can affect our sense of taste. Flavor expands our curiosity and understanding of one of our most intimate sensations while ultimately revealing how we can all sharpen our senses and our enjoyment of the things we taste. Certain to fascinate everyone from gourmands and scientists to home cooks and their guests, Flavor will open your mind and palette to a vast, exciting sensory world.
