The Political Reconstruction of American Tobacco, 1862-1933 Patrick Mulford O'Connor, 2025-06-03 A deeply researched and clearly argued account of the mutual growth of the federal government and the modern tobacco Nearly everything about the United States tobacco economy changed in the generation following the American Civil War From labor to consumption manufacturing to regulation tobacco was utterly reconstructed comparatively a new industry as one contemporary wrote The Political Reconstruction of American Tobacco 1862 1933 exposes the causes of these changes and in the process it reconsiders cornerstones of the American national narrative Through a detailed rendering of tobacco s late nineteenth century political economy this book argues that the federal state s and American capitalism s development were mutually constitutive and fundamentally political processes From the Civil War to the Progressive Era diverse political movements across tobacco s commodity chain drove state and market development creating the immense power and stifling poverty that defined tobacco s reconstruction The Political Reconstruction of American Tobacco 1862 1933 emphasizes the significance of the thousands of manufacturers whose interest groups shaped federal tax policy and in turn forged a powerful and effective internal revenue system the increasingly influential fertilizer producers and warehouse operators who determined tobacco s value and the crop scientists who sought to promote and rationalize US tobacco production As these actors reshaped tobacco s commodity chain they missed and even dismissed the interests of tobacco growers especially newly emancipated African Americans and smallholding whites throughout the South The ruling logic of tobacco s reconstructed political economy rationalized agrarian indebtedness justified low prices and intensified labor discipline on thousands of small farms In emphasizing these exclusions The Political Reconstruction of American Tobacco 1862 1933 reveals how nineteenth century state and economic development coincided with and even created rural poverty
