Stern, 1987-07-01 Using one of the largest quantitative data bases ever compiled on a single representative community Stern explains and substantiates the reasons for the decline of the fertility rate during the nineteenth and early twentieth centuries He integrates demographic and social history to determine the implications of this aspect of the modernization of America Society and Family Strategy describes the impact of capitalism and changing class and ethnic structure on family economy life cycle and ideology The author evaluates recent studies by social historians on the family social class and ethnicity in light of the Erie County experience examines theories of social and cultural change and proposes a non evolutionary model of their relationship

Who We Are Is Where We Are Amanda McMillan Lequieu, 2024-05-28 Half a century ago deindustrialization gutted blue collar jobs in the American Midwest But today these places are not ghost towns People still call these communities home even as they struggle with unemployment poverty and other social and economic crises Why do people remain in declining areas through difficult circumstances What do their choices tell us about rootedness in a time of flux Through the cases of the former steel manufacturing hub of southeast Chicago and a shuttered mining community in Iron County Wisconsin Amanda McMillan Lequieu traces the power and shifting meanings of the notion of home for people who live in troubled places Building from on the ground observations of community life archival research and interviews with long term residents she shows how inhabitants of deindustrialized communities balance material constraints with deeply felt identities McMillan

Lequieu maps how the concept of home has been constructed and the ways it has been reshaped as these communities have changed She considers how long term residents navigate the tensions around belonging and making ends meet long after the departure of their community s founding industry *Who We Are Is Where We Are* links the past and the present rural and urban to shed new light on life in postindustrial communities *Beyond a story of Midwestern deindustrialization* this timely book provides broader insight into the capacious idea of home how and where it is made threatened and renegotiated in a world fraught with change **American Ethnic Groups, the European Heritage** Francesco Cordasco, David Nelson

Alloway, 1981 No descriptive material is available for this title *Out of the Crucible* Dennis C. Dickerson, 1986-09-15 This book examines in depth the century long struggle of Black laborers in the iron and steel industry of western Pennsylvania In the process it shows how the fate of these Black workers mirrors the contemporary predicament of the Black working class and the development of a chronically unemployed underclass in America s declining industrial centers Dickerson argues that persistent racial discrimination within heavy industry and the decline of major industries during the 1970s are key to understanding the social and economic situation of twentieth century urban Blacks Through a blend of historical research and contemporary interviews this study chronicles the struggle of Black steelworkers to gain equality in the industry and the setbacks suffered as American steelmaking succumbed to foreign competition and antiquated modes of production The plight of western Pennsylvania s Black steelworkers reflects that of Black laborers in Chicago Gary Detroit Cleveland Youngstown Birmingham and other major American cities where heavy industry once flourished **False Promises** Stanley

Aronowitz, 1992 This classic study of the American working class originally published in 1973 is now back in print with a new introduction and epilogue by the author An innovative blend of first person experience and original scholarship Aronowitz traces the historical development of the American working class from post Civil War times and shows why radical movements have failed to overcome the forces that tend to divide groups of workers from one another The rise of labor unions is analyzed as well as their decline as a force for social change Aronowitz s new introduction situates the book in the context of developments in current scholarship and the epilogue discusses the effects of recent economic and political changes in the American labor movement **Capitalists against Markets** Peter A. Swenson, 2002-09-26 Conventional wisdom argues that welfare state builders in the US and Sweden in the 1930s took their cues from labor and labor movements Swenson makes the startling argument that pragmatic social reformers looked for support not only from below but also from above taking into account capitalist interests and preferences Juxtaposing two widely recognized extremes of welfare the US and Sweden Swenson shows that employer interests played a role in welfare state development in both countries **Our Own Time**

David R. Roediger, Philip S. Foner, 1989-11-17 *Our Own Time* retells the story of American labor by focusing on the politics of time and the movements for a shorter working day It argues that the length of the working day has been the central issue for the American labor movement during its most vigorous periods of activity uniting workers along lines of craft gender and

ethnicity The authors hold that the workweek is likely again to take on increased significance as workers face the choice between a society based on free time and one based on alienated work and unemployment **Power in the Workplace**

Steven Peter Vallas, 1993-01-07 This book presents a systematic case study of the hi tech communications industry that reveals many trends in managerial authority in the workplace Vallas reveals the mechanisms that enable advanced capitalist firms to achieve and maintain control over the workers they employ He demonstrates that the spread and integration of automated technologies place lower level human labor in positions of declining power The new regime does not deskill workers and need not lead toward what some have called electronic sweatshops Nevertheless Vallas concludes that increasing managerial control over production poses a major challenge to those who advocate labor participation in the management of American industries
