School Counseling Programs Jennifer Curry, Laura Fazio-Griffith, 2013-05-01 Play therapy interventions are critical elements of providing responsive services within the context of comprehensive school counseling programs. However, many school counselors are not trained in the use of play therapy techniques during their graduate training programs as Play Therapy is not a required course based on standards set by the Council for Accreditation of Counseling and Related Education Programs (CACREP) 2009. Indeed, while there are over 400 school counseling programs in the U.S., there are only 11 certified play therapy training centers. Even more critically, school counselors may not know which play therapy approaches and interventions are evidenced based for specific childhood concerns, e.g., selective mutism, social skills deficits, parent deployment. Play therapy is a structured, theoretically based approach to counseling that builds on the normal communicative and learning processes of children as they may not have developed the complexities of language to accurately express their concerns. Carmichael 2006, Gil 1991, Landreth 2002, O'Connor, yet many school counselors are unprepared to provide these vital resources. The focus of this book is on various play techniques and the application of various play therapy theories, i.e., Child Centered Play Therapy, Solution Focused Play Therapy, Cognitive Behavioral Play Therapy within comprehensive school counseling programs addressing various childhood concerns, prevention and intervention. Each chapter offers vignettes, a literature review of a specific childhood concern, e.g., homelessness, separation anxiety, pragmatic interventions for the school environment, and a case study to demonstrate application of techniques.

Play and Creativity in Art Teaching George Szekely, 2015-03-02 In *Play and Creativity in Art Teaching* esteemed art educator George Szekely draws on his two classic volumes *Encouraging Creativity in Art Lessons* and *From Play to Art* to create a new book for new times The central premise is that art teachers are not only a source of knowledge about art but also a catalyst for creating conditions that encourage students to use their own ideas for making art By observing children at play and using props and situations familiar to them teachers can build on children's energy and self-initiated discoveries to inspire school art that comes from the child's imagination The foundation of this teaching approach is the belief that the essential goal of art teaching is to inspire children to behave like artists that art comes from within themselves and not from the art teacher *Play and Creativity in Art Teaching* offers plans for the study of children's play and for discovering creative art teaching as a way to bring play into the art room While it does not offer a teaching formula or a single set of techniques to be followed it demystifies art and shows how teachers can help children find art in familiar and ordinary places accessible to everyone This book also speaks to parents and the important roles they can play in supporting school art programs and nourishing the creativity of their children
