American Political Economy in Global Perspective Harold L. Wilensky, 2012-02-29 This book is a guide to claims about the proper role of government and markets in a global economy Moving between systematic comparison of 19 rich democracies and debate about what the United States can do to restore a more civilized egalitarian and fair society Harold L Wilensky tells us how six of these countries got on a low road to economic progress and which components of their labor crunch strategy are uniquely American He provides an overview of the impact of major dimensions of globalization only one of which the interaction of the internationalization of finance and the rapid increase in the autonomy of central banks undermines either national sovereignty or job security labor standards and the welfare state Although Wilensky views American policy and politics through the lens of globalization he concludes that the nation state remains the center of personal identity social solidarity and political action He concentrates on what national differences mean for the well being of nations and their people Drawing on lessons from abroad and from America's own past successes Wilensky shows how we can reverse our three decade decline He argues that in order to get off the low road we must overcome the myths of moderation the rise of the independent voter and a rightward shift of the electorate He specifies a feasible domestic agenda that matches majority sentiments in all rich democracies

Large-Scale Knowledge Resources. Construction and Application Takenobu Tokunaga, Antonio Ortega, 2008-02-08 At the start of the 21st century we are now well on the way towards a knowledge intensive society in which knowledge plays ever more important roles Thus research interest should inevitably shift from information to knowledge with the problems of building organizing maintaining and utilizing knowledge coming central issues in a wide variety of fields The 21st Century COE program Framework for Systematization and Application of Large scale Knowledge sources COE LKR conducted by the Tokyo Institute of Technology is one of several early attempts worldwide to address these important issues Inspired by this project LKR2008 aimed at bringing together diverse contributions in cognitive science computer science education and linguistics to explore design construction extension maintenance validation and application of knowledge Responding to our call for papers we received 38 submissions from a variety of research areas

Each paper was reviewed by three Program Committee members. Since we were aiming at an interdisciplinary conference covering a wide range of topics concerning large scale knowledge resources LKR each paper was assigned a reviewer from a topic area outside the main thrust of the paper. This reviewer was asked to assess whether the authors described the motivation and importance of their work in a comprehensible manner even for readers in other research areas. Following a rigorous reviewing process we accepted 14 regular papers and 12 poster papers.
