Skeletal Muscle Henning Schmalbruch, 2012-12-06 This volume is intended to cover research in the field of muscle morphology since publication of the previous edition by Haggquist in 1956 The development of new techniques coupled with an intensified interest in muscle has resulted in a vast literature which no single person could review especially within the limitations of one volume When I accepted the flattering offer to write a new edition I quickly abandoned any hope of a comprehensive review Instead I tried to consider within my limits those lines of research which I believe to be important for the understanding of mammalian and ultimately human muscles under normal experimental and pathological conditions It would be naive to suggest that muscle can be adequately described in purely morphological aspects I would characterize the results of my effort as muscle as seen with the eyes of a morphologist It gives me pleasure to acknowledge the help of several colleagues who read and commented on drafts of individual chapters Dr Brenda Eisenberg Chicago Dr Else Nygaard Copenhagen Dr Stefano Schiaffino Padova Dr Michael Sjostrom Umea Dr Lars Erik Thornell Umea None of these individuals can be held responsible for any error or obscurity that persists Indeed without their assistance there would have been more I also thank those colleagues who allowed me to include their published and unpublished material their names and also those of the publishers who kindly granted copyright permission are given in the individual figure captions
