Development and examines some of the unfolding experiences of LED in the developing world. The focus is upon the region of southern Africa and more especially upon post apartheid South Africa. LED emerged in South Africa as one of the more significant post apartheid development options being pursued by empowered localities with the overt encouragement of national government. Elsewhere in the developing world much interest surrounds the experience of LED in post apartheid South Africa which is seen as a laboratory for experimentation, innovation and learning. The seventeen chapters in this book examine the range of LED interventions that have been the basis for experimentation in the last decade including both pro market as well as pro poor interventions. Key themes include debates about the most appropriate policy directions for LED, its contribution towards sustainable development, the role of social capital, cluster support, public procurement, eco development, good governance and tourism led LED. The book also contains a series of detailed case studies on the implementation of LED in South Africa and the wider region of southern Africa including analyses of LED undertaken at a variety of scales from the provincial, metropolitan and small town level. Until now most research on local economic development has focused on the developed world. This volume breaks new ground in applying LED policy and practices to problems specific to the developing world. It will be of interest to scholars of development studies, urban and regional planning, human geography and urban studies. This compelling and comprehensive book provides a look at the innovative, including pro poor, local economic development strategies being used in South Africa. The contributors to *Local Economic Development in the Changing World: The Experience of Southern Africa* are among the very best scholars in the field. Gary Gaile, University of Colorado, Etienne Nel and Christian Rogerson have produced an excellent book on local economic development in South Africa. The chapters in this timely volume contain many valuable lessons for both the developing and the developed world. Of particular importance is the policy focus of Nel and Rogerson on investing in and empowering low income workers, entrepreneurs, families and neighborhoods. Because of the special emphasis on inclusive economic development strategies, this book is a very useful guide to what the Prague Institute calls 'Treating People and Communities as Assets'. Dr Marc A Weiss, Chairman and CEO, Prague Institute for Global Urban Development. Etienne Nel is associate professor in the Department of Geography of Rhodes University, Grahamstown, South Africa. Christian M Rogerson is professor of human geography, School of Geography, Archaeology and Environmental Studies, University of Witwatersrand, Johannesburg.

Enterprise and Economic Development in Africa Dina M. Nziku, John J. Struthers, 2021-06-11. Presenting a topical analysis of the challenges and achievements of enterprise. *Enterprise and Economic Development in Africa* examines contributions to economic development on the continent as well as exploring implications for policy dimensions.
