Organization of the United Nations, 2018-10-31 Through an array of project outcomes in different countries this paper demonstrates that contract farming is a win win solution because young workers gain access to markets while private companies have access to produce without acquiring land or supervising labour **Cooperatives, the State, and Corporate Power in African Export Agriculture** Karin Wedig, 2019-02-22 Agriculture is a major contributor to Africa's GDP the region's biggest source of employment and its largest food producer However agricultural productivity remains low and buyer driven global value chains offer few opportunities for small producers to upgrade into higher value added activities In recent years the revival of Africa's cooperatives has been celebrated by governments and international donors as a pathway towards inclusive agricultural development and this book explores the strengths but also the issues which surround these cooperatives The book scrutinizes the neoliberal ideal of economic prosperity arising through the operation of liberalized labor markets by illuminating the discriminatory nature of Uganda's informal labor relations It points to the role of cooperatives as a potential instrument of progressive change in African export agriculture where large numbers of small producers depend on casual wage work in addition to farming In contrast to the portrayal advanced by some governments and rarely questioned by donors of an unproblematic co-existence of small producers collective action and big capital interests the author calls for a re-politicized debate on the Social and Solidarity Economy As part of this she highlights the adverse political and economic conditions faced by African cooperatives including intense international competition in agricultural processing inadequate access to infrastructure and services and at times antagonistic state cooperative relations Supported by wide ranging interdisciplinary evidence including new ethnographic survey and interview data this book shows how cooperatives may be co-opted by both the state and corporations in a discourse that ignores structural inequalities in value chains and emphasizes poverty reduction over economic and political empowerment It provides a critique of New Institutional Economics as a framework for understanding how institutions shape redistribution and develops a political economy approach to explore the conditions for structural change in African export agriculture *Innovative Institutions, Public Policies And Private Strategies For Agro-enterprise Development* Ralph D Christy, Carlos A Da Silva, Nomathemba Mhlanga, Krisztina Tihanyi, Edward Mabaya, 2014-09-12 In an effort to promote agro-enterprises and agro-industries as viable forms of inclusive development the Food and Agriculture Organization of the United Nations FAO and The Cornell International Institute for Food Agriculture and Development CIIFAD in collaboration with the International Association of Agricultural Economists IAAE organized an international symposium on the topic Innovative Institutions Public Policies and Private Strategies for Inclusive Agro-Enterprise Development as part of the Triennial Meetings of the IAAE held in Foz de Iguaçu Brazil in August 2012 This book contains the major papers presented at the symposium which feature a wide range of country and regional experiences and examine the influence of markets and technology transfer to agro-enterprises on food security poverty and economic growth The contributions also identify alternative market access strategies for sustainable
