**Electrically Small, Superdirective, and Superconducting Antennas** R. C. Hansen, 2006-06-19 A seminal reference to electrically small antennas for today's wireless and Wi-Fi world This book is dedicated to the challenges posed by electrically small antennas and their solutions Electrically small antennas have characteristics that limit performance low radiation resistance high reactance low efficiency narrow bandwidth and increased loss in the matching network Most of these limitations are shared by two other classes of antennas superdirective and superconducting antennas All three classes of antennas are thoroughly treated in three interrelated parts Part One Electrically Small Antennas begins with a discussion of the fundamental limitations of bandwidth and matching then provides detailed design information on loaded whips and dipoles ferrite loops patches with unusual substrates and dielectric resonator antennas In addition to exploring designs that work the author sets forth antenna designs that are based on good physics yet are poor performers as well as designs with both poor underlying physics and poor performance Part Two Superdirective Antennas sets forth basic capabilities and limitations of superdirective antennas both apertures and arrays and investigates bandwidth efficiency and tolerances The author explores the magnification of intrinsic matching circuit loss due to a large mismatch and evaluates the recent and promising non Foster matching circuits Part Three Superconducting Antennas reviews superconductivity concepts and new principles for dipole loop and patch antennas The author concludes with a discussion of superconducting delay lines for wideband phased array steering Throughout the book the author provides readers with a historical perspective setting forth what has been investigated what works and what does not Each part has its own author index and a list of references to help readers continue their explorations of particular topics With the explosive demand for wireless and Wi-Fi this seminal reference is essential reading for all antenna professionals and is recommended as a graduate level course book

**Small Town Big Rumors** Willow Winters, He tasted like tequila and the fake name I gave him was Rose Four years ago I decided to get over one man by getting under another A single night and nothing more I found my handsome stranger with a shot glass and charming but devilish smile at the end of the bar The desire that hit his eyes the second they landed on me ignited a spark inside me instant and hot He was perfect and everything I didn't know I needed That one night may have ended but I left with much more than a memory Four years later and with a three year old in tow the man I still dream about is staring at me from across the street in the town I grew up in I don't miss the flash of recognition or the heat in his gaze The chemistry is still there even after all these years I just hope the secrets and regrets don't destroy our second chance before it's even begun
