processed into a wide palette of products can be answered by the use of methodologies developed by data scientists and those from the fields of different omics All this information can be passed along the chain to consumers in a repeatable manner The producers can use these data to manage such complex issues as meat or product quality And this closes the circle Tracing the domestic pig is an attempt to present the current knowledge about this valuable animal its origin composition and the food that it gives us and to predict or foresee what can happen to this species in the time to come
