Child Sexual Abuse Reported by Adult Survivors Sinéad Ring, Kate Gleeson, Kim Stevenson, 2022-04-28 *Child Sexual Abuse Reported by Adult Survivors* is a wide ranging and timely critical history and analysis of legal responses to historical or non recent child sexual abuse NRCSA in England and Wales Ireland and Australia each of which represents an evolving and progressive approach to this important and complex issue The book examines the emergence of NRCSA as a distinctive social political and legal phenomenon in each country and explores the legal responses developed to address its unprecedented challenges Courts and parliaments in each country have reformed existing doctrine and practice and have created new ways of holding state and

private actors accountable and new ways of addressing survivors injuries Criminal law tort law public inquiries and state reparations have all been to the forefront of these new legal responses which have transformed law s engagement with NRCSA survivors and understandings of justice itself However despite this undeniable progress the book identifies ways in which the legal responses developed in each country fail to deliver accountability and recognition to NRCSA survivors and argues that such failures betray the law s inherent ambivalence to delivering justice for these survivors Creating new insights into legal responses to this complex contemporary legal social and political problem this book will be of great interest to academic lawyers political scientists and historians as well as those working on related topics in criminology sociology social policy cultural studies and gender studies

Postcolonial Imaginings David Punter, 2000 This deeply engaging historically and culturally informed book provides new perspectives on a wide range of writers and at the same time provides a radically new development of many of the most pertinent issues in the field of postcolonial writing and theory It constitutes a major new engagement between the postcolonial and a conception of the literary that is richly innovative in its deployment of psychoanalytic deconstructive and other approaches to the text The book begins with some brief background to the issue of decolonization and its contemporary effects It is informed throughout by a clear sense of literary and political context within which chosen texts by well known

writers Derek Walcott Chinua Achebe Edward Kamau Brathwaite as well as less well known ones Joan Riley Susan Power Abdulrazak Gurnah and writers not often seen in a postcolonial context James Kelman Seamus Deane Hanif Kureishi can be situated The chapters that follow are based around themes such as violent geographics hallucination dream and the exotic mourning and melancholy diaspora and exile delocalization and the alibi This profoundly new approach to the complexities of the postcolonial allows the reader to appreciate some of the richness but at the same time the political and cultural ambivalence which underlies postcolonial writing Throughout the book David Punter continually questions as one would expect from his many previous books the definition and scope of the postcolonial It is seen throughout as a phenomenon not restricted to the ex or neo colonies but as a key characterisation of all our lives at the beginning of the twenty first century It is an indissoluble part of the development of national imaginings and at the same time an alibi for the emergence of a violently assertive new world order committed to the management and obliteration of difference By juxtaposing texts from different cultural traditions and topographies from *Things Fall Apart* to *The Bone People* from Anot

The Nature of Life and Its Potential to Survive David S. Stevenson, 2017-05-25 This book looks at the persistence of life and how difficult it would be to annihilate life especially a species as successful as humanity The idea that life in general is fragile is challenged by the hardiness of microbes which shows that astrobiology on exoplanets and other satellites must be robust and plentiful Microbes have adapted to virtually every niche on the planet from the deep hot biosphere to the frigid heights of the upper troposphere Life it seems is almost indestructible The chapters in this work examine the various scenarios that might lead to the extermination of life and why they will almost always fail Life's highly adaptive nature ensures that it will cling on no matter how difficult the circumstances Scientists are increasingly probing and questioning life's true limits in on and above the Earth and how these limits could be pushed elsewhere in the universe This investigation puts life in its true astronomical context with the reader taken on a journey to illustrate life's potential and perseverance
