Non-Bayesian Decision Theory Martin Peterson, 2008-06-06 For quite some time philosophers economists and statisticians have endorsed a view on rational choice known as Bayesianism The work on this book has grown out of a feeling that the Bayesian view has come to dominate the academic community to such an extent that an alternative non Bayesian position is rarely researched Needless to say I think this is a pity Non Bayesian positions deserve to be examined with much greater care and the present work is an attempt to defend what I believe to be a coherent and reasonably detailed non Bayesian account of decision theory The main thesis I defend can be summarised as follows Rational agents maximise subjective expected utility but contrary to what is claimed by Bayesians utility and subjective probability should not be defined in terms of preferences over uncertain prospects On the contrary rational decision makers need only consider preferences over certain outcomes It will be shown that utility and probability functions derived in a non Bayesian manner can be used for generating preferences over uncertain prospects that support the principle of maximising subjective expected utility To some extent this non Bayesian view gives an account of what modern decision theory could have been like had decision theorists not entered the Bayesian path discovered by Ramsey de Finetti Savage and others I will not discuss all previous non Bayesian positions presented in the literature

Multicriteria and Multiobjective Models for Risk, Reliability and Maintenance Decision Analysis Adiel Teixeira de Almeida, Cristiano Alexandre Virginio Cavalcante, Marcelo Hazin Alencar, Rodrigo José Pires Ferreira, Adiel Teixeira de Almeida-Filho, Thalles Vitelli Garcez, 2015-07-01 This book integrates multiple criteria concepts and methods for problems within the Risk Reliability and

Maintenance RRM context The concepts and foundations related to RRM are considered for this integration with multicriteria approaches In the book a general framework for building decision models is presented and this is illustrated in various chapters by discussing many different decision models related to the RRM context The scope of the book is related to ways of how to integrate Applied Probability and Decision Making In Applied Probability this mainly includes decision analysis and reliability theory amongst other topics closely related to risk analysis and maintenance In Decision Making it includes a broad range of topics in MCDM Multi Criteria Decision Making and MCDA Multi Criteria Decision Aiding also known as Multi Criteria Decision Analysis In addition to decision analysis some of the topics related to Mathematical Programming area are briefly considered such as multiobjective optimization since methods related to these topics have been applied to the context of RRM The book addresses an innovative treatment for the decision making in RRM thereby improving the integration of fundamental concepts from the areas of both RRM and decision making This is accomplished by presenting an overview of the literature on decision making in RRM Some pitfalls of decision models when applying them to RRM in practice are discussed and guidance on overcoming these drawbacks is offered The procedure enables multicriteria models to be built for the RRM context including guidance on choosing an appropriate multicriteria method for a particular problem faced in the RRM context The book also includes many research advances in these topics Most of the multicriteria decision models that are described are specific applications that have been influenced by this research and the advances in this field Multicriteria and Multiobjective Models for Risk Reliability and Maintenance Decision Analysis is implicitly structured in three parts with 12 chapters The first part deals with MCDM A concepts methods and decision processes The second part presents the main concepts and foundations of RRM Finally the third part deals with specific decision problems in the RRM context approached with MCDM A models

The Polygraph and Lie Detection National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Board on Behavioral, Cognitive, and Sensory Sciences, Committee to Review the Scientific Evidence on the Polygraph, 2003-01-22 The polygraph often portrayed as a magic mind reading machine is still controversial among experts who continue heated debates about its validity as a lie detecting device As the nation takes a fresh look at ways to enhance its security can the polygraph be considered a useful tool The Polygraph and Lie Detection puts the polygraph itself to the test reviewing and analyzing data about its use in criminal investigation employment screening and counter intelligence The book looks at The theory of how the polygraph works and evidence about how deceptiveness and other psychological conditions affect the physiological responses that the polygraph measures Empirical evidence on the performance of the polygraph and the success of subjects countermeasures The actual use of the polygraph in the arena of national security including its role in deterring threats to security The book addresses the difficulties of measuring polygraph accuracy the usefulness of the technique for aiding interrogation and for deterrence and includes potential alternatives such as voice stress analysis and brain measurement

techniques **The Power of Intuition** Gary Klein,2007-12-18 At times in our careers we've all been aware of a gut feeling guiding our decisions Too often we dismiss these feelings as hunches and therefore untrustworthy But renowned researcher Gary Klein reveals that in fact 90 percent of the critical decisions we make is based on our intuition In his new book THE POWER OF INTUITION Klein shows that intuition far from being an innate sixth sense is a learnable and essential skill Based on interviews with senior executives who make important judgments swiftly as well as firefighters emergency medical staff soldiers and others who often face decisions with immediate life and death implications Klein demonstrates that the expertise to recognize patterns and other cues that enable us intuitively to make the right decisions is a natural extension of experience Through a three tiered process called the Exceleration Program Klein provides readers with the tools they need to build the intuitive skills that will help them make tough choices spot potential problems manage uncertainty and size up situations quickly Klein also shows how to communicate such decisions more effectively coach others in the art of intuition and recognize and defend against an overdependence on information technology The first book to demystify the role of intuition in decision making THE POWER OF INTUITION is essential reading for those who wish to develop their intuition skills wherever they are in the organizational hierarchy **Risk: A Very Short Introduction** Baruch Fischhoff,John

Kadvany,John David Kadvany,2011-05-26 Risks are everywhere They come from many sources including crime diseases accidents terror climate change finance and intimacy They arise from our own acts and they are imposed on us In this Very Short Introduction Fischhoff and Kadvany draw on both the sciences and humanities to show what all risks have in common Do we care about losing money health reputation or peace of mind How much do we care about things happening now or in the future To ourselves or to others All risks require thinking hard about what matters to us before we make decisions about them based on past experience scientific knowledge and future uncertainties Using conceptual frameworks such as decision theory and behavioural decision research we examine the science and practice of creating measures of risk and look at how scientists apply probability by combining historical records scientific theories and expert judgement Showing what science has learned about how people deal with risks and applying these to diverse everyday examples the authors demonstrate how we move from understanding a risk to making a choice in everyday life **Great Decision-Making Skills** Corona
