Constitutional Law, Religion and Equal Liberty Azin Tadjini,2019-09-19 During the 20th century many countries embarked on a process of constitutional secularization by which the role of religion gradually became limited Yet by the late 20th century and increasingly following the end of the Cold War this development began to be challenged This book examines the return of religion in constitutions through the concept of constitutional de secularization It places this phenomenon in the context of the constitutional memory of the countries in which it has taken place and critically examines it against the development and standards of constitutionalism as the prevailing constitutional legal and political theory Central to this analysis is the impact of constitutional de secularization on the regulation of equality in liberty that is both the regulation of constitutional rights and the scope for equality of those who are granted such rights The book argues that equal

liberty forms an essential part of constitutionalism as a theory and that constitutionalism therefore entails a continuous development towards expanding it The first and second part of the book presents a conceptual framework for the study of constitutional de secularization The third part presents and analyses three cases of constitutional de secularization in Afghanistan Iran and Iraq The book will be of interest to researchers and policy makers interested in constitutional history and theory and the role of religion in law and its compatibility with human rights **Original Sin** Bleddyn E.

Bowen,2023-01-01 Space technology was developed to enhance the killing power of the state The Moon landings and the launch of the Space Shuttle were mere sideshows drawing public attention away from the real goal military and economic control of space as a source of power on Earth Today as Bleddyn E Bowen vividly recounts thousands of satellites work silently in the background to provide essential military intelligence and economic capabilities No major power can do without them Beyond Washington Moscow and Beijing truly global technologies have evolved from the ground floor of the nuclear missile revolution to today's orbital battlefield shaping the wars to come World powers including India Japan and Europe are fully realizing the strategic benefits of commanding Earth's cosmic coastline as a stage for war development and prestige Yet as new contenders spend more and more on outer space there is scope for cautious optimism about the future of the Space Age if we can recognize rather than hide its original sin **Dilemmas of Decline** Ian Hall,2012-08 In just three decades

Great Britain's place in world politics was transformed In 1945 it was the world's preeminent imperial power with global interests By 1975 Britain languished in political stasis and economic recession clinging to its alliance with the United States and membership in the European Community Amid this turmoil British intellectuals struggled to make sense of their country's decline and the transformed world in which they found themselves This book assesses their responses to this predicament and explores the different ways British thinkers came to understand the new international relations of the postwar period
