Tobacco in Global Perspective, 1780-1960 Alexander van Wickeren, Jean Stubbs, William Gervase Clarence-Smith, 2024-12-24 This edited collection provides an in depth analysis of the imperial colonial and postcolonial history of tobacco from 1780 to 1960 which was one of the major periods of change in the global tobacco economy It brings together case studies from known and lesser known tobacco regions of the world to interrogate tobacco s second globalisation a concept little employed by historians thus far but one which encapsulates tobacco s central role in Europe s imperial expansion beyond the Atlantic and the social political and cultural transformations of global capitalism taking place during the period The collection fills a gap in the study of commodities of empire which has examined tobacco primarily for the early modern Atlantic world or for single empires during the later period It invites comparison across borders encompassing political economic and sociocultural history and with a particular emphasis on trade knowledge and labour juxtaposes micro histories with a macro historical perspective Together the studies in the volume testify to the importance of tobacco in new places and among new players challenging the confines of national and imperial historiographical frameworks They demonstrate the rising dominance of new powerful forces including transnational corporations but also a wide range of actors in conflict and negotiation within territorial and imperial confines By systematically taking into account the agency in Europe s apparent peripheries and the Global South they critique a simple assumption of the dominance of the West Chapter 11 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

Friedman, 2016-06-27 Scent is both an essential and seemingly impossible to recover aspect of material culture Scent is one of our strongest ties to memory yet to remember a smell without external stimuli is almost impossible for most people Moreover human beings specifically Western humans ability to smell has been diminished through a process of increased emphasis on odor removal hygienic practices that emphasize de odorization rather than the covering of one odor by another While other intangibles of the human experience have been placed into the context of the eighteenth century novel scent has so far remained largely sidelined in favor of discussions of the visual the aural touch and taste The past decade has seen a great expansion of our understanding of how smell works physiologically psychologically and culturally and there is no better moment than now to attempt to recover the traces of olfactory perceptions descriptions and assumptions Reading Smell provides models for how to incorporate olfactory knowledge into new readings of the literary form central to our understanding of the eighteenth century and modernity in general the novel The multiplication and development of the novel overlaps strikingly with changes in personal and private hygienic practices that would alter the culture s relationship to smell This book examines how far the novel can be understood through a reintroduction of olfactory

information After decades of reading for all kinds of racial cultural gendered and other sorts of absences back into the novel this book takes one step further to consider how the recovery of forgotten or overlooked olfactory assumptions might reshape our understanding of these texts Reading Smell includes wide scale research and focused case studies of some of the most striking or prevalent uses of olfactory language in eighteenth century British prose fiction Highlighting scents with shifting meanings across the period bodies tobacco smelling bottles and sulfur Reading Smell not only provides new insights into canonical works by authors like Swift Smollett Richardson Burney Austen and Lewis but also sheds new light on the history of the British novel as a whole
