Tibetan Logic Katherine Rogers, 2009-03-16 Within Tibetan Buddhism has arisen a system of education and a curriculum designed to enable the student to develop a path of reasoning a consciousness trained in reasoned analysis until capable of understanding first the meaning of religious texts and eventually the true nature of reality An important aspect of Tibetan logic is that it is used to develop new and valid knowledge about oneself and the world Included here is a translation of a text by Pur bu jok the Thirteenth Dalai Lama s philosophy tutor on the topic of Signs and Reasonings a manual introducing beginners to the principles vocabulary and concepts of the system of logic The purpose of Pur bu jok s text is to lay a foundation for understanding how valid cognition is acquired What is validity How is valid knowledge acquired What can be known Further what knowledge can be acquired through reasoning that will lead one to spiritual development and even to buddhahood Katherine Rogers has enriched the translation with commentary by several eminent scholars of the Ge luk pa order revealing a marvelous path that draws one into the heart of the Tibetan approach to knowledge and self transformation It is fundamental to Tibetan thought that true knowledge is practical useful and ultimately transforming and liberating Such knowledge is far from obvious but it can be attained through correct reasoning Thus logic is an important tool a part of the spiritual path leading ultimately to complete self transformation *Jungling in Jaspar*, Lawrence Johnstone Burpee, 1929

Science and Philosophy in the Indian Buddhist Classics, Vol. 3 Dalai Lama XIV Bstan-'dzin-rgya-mtsho, Dalai Lama, Thupten Jinpa, 2022-12-13 Deepen your understanding of meaning and truth with the third volume of the Dalai Lama s esteemed series *Science and Philosophy in the Indian Buddhist Classics* In this third volume the focus turns to exploring the philosophical schools of India The practice of presenting the views of various schools of philosophy dates back to the first millennium in India when proponents of competing traditions would arrange the diverse sets of philosophical positions in a hierarchy culminating in their own school s superior tenets Centuries later relying on the Indian Buddhist treatises Tibet developed its own tradition of works on tenets grub mtha often centered on the four schools of Buddhist philosophy using them to demonstrate the philosophical evolution within their own tradition and within individual practitioners as they progressed through increasingly more subtle expressions of the true reality The present work follows in this venerable

tradition but with a modern twist Like its predecessors it presents the views of seven non Buddhist schools those of the Samkhya Vaishesika Nyaya Mimamsa Vedanta Jaina and Lokayata followed by the Buddhist Vaibhasika Sautrantika Cittamatra and Madhyamaka schools arranging them like steps on a ladder to the profound But rather than following in the sharply polemical approach of its ancient predecessors it strives to survey each tradition authentically relying on and citing the texts sacred to each allowing the different traditions to speak for themselves What it asks are the basic components of the world we experience What is the nature of their ultimate reality And how can we come to experience that for ourselves See how the rich spiritual traditions of India approached these key questions where they agreed and how they evolved through dialogue and debate Provided by publisher The Desert Rider L.
