Steel Structures Behavior And Lrfd Without Sub Card:

MP Ramulu S. Vinnakota, 2005-01 Ramulu Vinnakota's Behavior and LRFD of Steel Structures stresses both the design of steel structures as do the competing texts and the behavior of steel under specific conditions. The most recent editions of the American Institute of Steel Construction's Load and Resistance Factor Design Specifications 3e 1999 and the LRFD Manual 3e 2001 are used and extensively referenced in the Vinnakota text and these documents are based on the behavior of steel. Therefore covering the interaction of design and behavior in one textbook is a unique approach. Designers must understand structural behavior as an integral part of the design process and chapters 1 to 5 thoroughly cover this material. As Ramulu Vinnakota notes, 'The heart and soul of design are the ability to conceive a structure that will behave as desired and intuition regarding different framing options.' The balance of the chapters covers the elements that make up a steel building structure: members and connections. In each chapter, discussion of theory and behavior of the member under various combinations of loads it must resist is followed by a discussion of design applications. Throughout the text, a web icon references readers to the book's website <http://www.mhhe.com/vinnakota> which contains extensive additional coverage of advanced topics.

Constructional Steel Design P.J. Dowling, R. Bjorhovde, J. E. Hard, 1992-11-13 Constructional Steel Design presents state of the art knowledge on the design of steel structures.
