

Microsoft® Office® 2007 Step-by-Step for Educators

The Microsoft Office suite can be one of the most useful tools both in and outside of the classroom. Whether a person is presenting with Microsoft® PowerPoint®, writing with Microsoft® Word®, or taking notes with Microsoft® OneNote®—Office is an essential part of teaching and learning. This document covers some helpful Microsoft Office 2007 tips and tricks for teachers.

The Office 2007 User Interface

In Office 2007, we dramatically improved the user interface after thousands of hours of customer research and hundreds of designs. Our goal was to make the programs easier to use, and help you discover new, more efficient ways to get your work done. The result is a very visual and more dynamic interface.

The Ribbon

The heart of this new interface is the ribbon. The ribbon replaces traditional menus and toolbars with a highly visual layout of commands that helps you find the features you need fast. All the tools for working in your documents have been logically grouped into tabs—each one, organized around a particular set of activities. To keep things simple, some tabs only appear when needed. For instance, the Table Tools tabs only appear when you insert or select a table. Just click on the object you want to edit, and the tools you need will be displayed.

The home tab in the new Office 2007 ribbon: insert or select a table and the Table Tools tabs appear.

Galleries and Live Preview

Galleries present a selection of the results you can achieve with a feature, such as a selection of designs or formats. As you move your mouse over the options, Live Preview shows you exactly how they would look in your document. When you like what you see, just click on the results you want.
