**An Unnatural History** Worth Books, 2017-02-14 So much to read so little time This brief overview of The Sixth Extinction

tells you what you need to know before or after you read Elizabeth Kolbert's book *Crafted* and edited with care. Worth Books set the standard for quality and give you the tools you need to be a well-informed reader. This short summary and analysis of *The Sixth Extinction: An Unnatural History* by Elizabeth Kolbert includes historical context, chapter-by-chapter overviews, detailed timeline of key events, important quotes, fascinating trivia, glossary of terms, supporting material to enhance your understanding of the original work, and about *The Sixth Extinction* by Elizabeth Kolbert. Our planet has endured five events of mass extinction from centuries of catastrophic heating and cooling to the asteroid that fell to earth and ended the Cretaceous Period. We are currently facing the sixth extinction, and this time the human species is to blame. Elizabeth Kolbert travels the world and meets with scientists who are grappling with the ecological outcomes of human activity. Her Pulitzer Prize-winning modern science classic tells the stories of thirteen different species that have already disappeared or are on the brink of extinction as a result of human activity. A captivating blend of research and historical anecdotes enlightens readers about the unintentional consequences of our behaviors from climate change and global warming to invasive species and overexploitation. The summary and analysis in this ebook are intended to complement your reading experience and bring you closer to a great work of nonfiction.

Key Takeaways Analysis Review Preview. *The Sixth Extinction* is a book by award-winning journalist Elizabeth Kolbert. In this book, the author demonstrates that species are dying out at a rate comparable to the previous mass extinctions, and if the trend of global warming, deforestation, and pollution continues in its present course, the numbers of extinct species will meet or exceed that rate of destruction. This event will include the extinction of humanity. What this means is that the current loss of life today will soon justify the term *The Sixth Extinction*, a mass extinction like the one that destroyed the dinosaurs 65 million years ago. When humans originated about 100,000 years ago, they began to hunt some species into extinction. Their ability to outcompete other early hominids for food led to the extinction of those species, including Neanderthals. The extinction of species picked up steam when humans began transforming great swaths of forest and plains into farmland about 10,000 years ago.
