Skeletal Trauma Guillaume Bierry, 2021-01-07 A key to being confident in the evaluation of skeletal trauma imaging is to rely on the identification of mechanism specific traumatic features Indeed for each mechanism of injury applied to a particular part of the skeleton the latter can only present predefined traumatic injuries this is a pattern of injuries The recognition of such a pattern of imaging allows the reader to determine the injuring mechanism and look for damages of lesser expression or even invisible damages that are common to the identified mechanism In becoming more familiar with those mechanisms the readers can deal with trauma imaging more efficiently and directly focus on findings relevant for further management

Skeletal Trauma A Mechanism Based Approach of Imaging aims to combine the knowledge of both radiologists and surgeons to propose a mechanism based approach to imaging in skeletal trauma Along 15 chapters covering every part of the skeleton with more than 900 figures this book reviews the anatomy standard radiologic views and imaging findings of skeletal trauma Over 200 original schemas invite the reader to understand the imaging features and determine the injuring mechanism Presents a comprehensive review of skeletal injuries using a mechanism based approach Reviews relevant anatomy on common trauma radiologic views and cross sectional imaging Details the most frequent circumstances of trauma including mechanisms of injuries and structures involved for each Helps readers understand why and where injuries occur and how they present on imaging

Skeletal Trauma Analysis Nicholas V.

Passalacqua, Christopher W. Rainwater, 2015-06-15 In the post Daubert era forensic science disciplines are increasingly informed by robust statistically sound experimental research The educational value of the well documented case study however remains as important as ever Emphasizing known contextual information this volume serves as a case driven guide to skeletal trauma analysis through the unique perspective of each chapter s authors Both forensic anthropologists and pathologists contribute skeletal trauma cases covering a range of topics including child abuse blunt force trauma descents from height plane crashes sharp force trauma and dismemberment gunshot wounds blast trauma and burned body interpretation Several chapters also include a discussion of potentially confounding taphonomic influences such as animal scavenging water immersion burning and extended postmortem intervals Detailed descriptions with multiple supporting images allow the practitioner s skeletal trauma interpretation to be compared to the answer as it pertains to the known circumstances surrounding the traumatic events of each case
